NEW LOGO, NEW HEADQUARTERS

**Energieker is the synthesis of a long ceramic history. The brand was born in 1997 from the relaunch of an industrial reality already existing since 1986. Since then, continuous investments in research and technology contributed to consolidate the company's position in the high-end market, until making it an international protagonist of Made in Italy ceramics. Recently, Energieker has renewed the brand and inaugurated a new prestigious Headquarters in Pavullo, with a showroom of over 1,200 square meters to best display the extraordinary porcelain stoneware collections and large ceramic slabs.**

Energieker è la sintesi di una lunga storia ceramica. Il marchio è nato nel 1997 dal rilancio di una realtà industriale attiva dal 1986. Da allora, i continui investimenti in ricerca e tecnologia lo hanno consolidato nella fascia alta del mercato, fino a renderlo un protagonista internazionale del Made in Italy ceramico. Di recente, Energieker ha rinnovato il marchio e inaugurato un nuovo prestigioso Headquarters a Pavullo, dotato di uno showroom di oltre 1.200 mq per esporre al meglio le straordinarie collezioni in gres porcellanato e le grandi lastre ceramiche.

Energieker est la synthèse d'une longue histoire céramique. La marque est née en 1997 de la relance d'une réalité industrielle existant déjà depuis 1986. Depuis lors, des investissements continus dans la recherche et la technologie l'ont consolidée dans le haut de gamme du marché, jusqu'à en faire un protagoniste international de la céramique Made in Italy. Récemment, Energieker a renouvelé la marque et inauguré un nouveau siège prestigieux à Pavullo, avec un showroom de plus de 1 200 m<sup>2</sup> pour exposer au mieux les extraordinaires collections en grès cérame et les grandes dalles céramiques.

Energieker ist die Synthese einer langen Keramikgeschichte. Die seit 1986 bestehende Marke wurde 1997 wiederbelebt. Durch kontinuierliche Investitionen in Forschung und Technologie gehört Energieker zu den internationalen Protagonisten des oberen Marktsegments mit dem Prädikat „Made in Italy“. Erst vor kurzem hat Energieker das Markenlogo erneuert und seinen prestigeträchtigen Hauptsitz in Pavullo eingeweiht und verfügt nun über einen Showroom von über 1200m<sup>2</sup> um seine aussergewöhnliche Feinsteinzeugkollektionen zu präsentieren.

**In recent years, a huge investment plan has completed our plants with a line dedicated to the production of large porcelain stoneware slabs. Today, our factories are a concentrate of the best ceramic technology in terms of production efficiency and management effectiveness, with optimization of consumption and emissions.**

Negli ultimi anni, un ingente piano di investimenti ha completato i nostri impianti con una linea per la produzione di grandi lastre in gres porcellanato. Oggi, i nostri stabilimenti sono un concentrato della migliore tecnologia ceramica in termini di efficienza produttiva ed efficacia gestionale, con ottimizzazione dei consumi e delle emissioni.

Ces dernières années, un vaste plan d'investissement a complété nos installations avec une ligne de production de grandes dalles en grès cérame. Aujourd'hui, nos usines sont un concentré de la meilleure technologie céramique en termes de efficacité de la production et efficacité de la gestion, avec optimisation des consommations et des émissions.

In den letzten Jahren wurde unser Werk durch einen umfangreichen Investitionsplan mit einer Linie zur Herstellung großer Feinsteinzeugplatten. Heute ist unsere Fabrik ein Konzentrat aus bester Keramiktechnologie in Bezug auf Produktionseffizienz und Wirtschaftlichkeit in Verbindung mit der Optimierung des Verbrauchs und Emissionen.

# Where quality meets design

Dove la qualità incontra il design  
Où la qualité rencontre le design  
Wo Qualität auf Design trifft

**We offer architects, designers, distributors and users surfaces with the highest technical, aesthetic and quality levels. Our range is complete and varied, with sizes from 30x60 up to 160x320, available in a wide number of surfaces, colors, looks, decorations for indoor and outdoor floors and walls, as well as for tables, worktops and furnishing accessories.**

Ci proponiamo ad architetti, progettisti, distributori e utilizzatori con superfici ai massimi livelli tecnici, estetici e qualitativi. La nostra gamma è completa e variegata, con formati dal 30x60 al 160x320, declinati su un ampio numero di superfici, colori, look, decori per pavimenti e rivestimenti interni ed esterni, così come per tavoli, piani lavoro e complementi di arredo.

Nous proposons aux architectes, designers, distributeurs et utilisateurs des surfaces aux plus hauts niveaux techniques, esthétiques et qualitatifs. Notre gamme est complète et variée, avec des formats du 30x60 au 160x320, déclinés sur un grand nombre de surfaces, couleurs, looks, décors pour sols et murs intérieurs et extérieurs, ainsi que pour tables, plans de travail et compléments d'ameublement.

Wir bieten Architekten, Designern, Händlern und Anwendern, Oberflächen mit höchsten technischen, ästhetischen und qualitativen Ansprüchen. Unser Sortiment ist komplett und vielfältig, mit Formaten von 30x60 bis 160x320, in einer Vielzahl von Oberflächen, Farben, Optiken und Dekoren für Böden und Wände für den Innen- und Außenbereich sowie für Tische, Arbeitsplatten und Einrichtungsgesamtheiten.

# Technological innovations that enhance design

Innovazioni tecnologiche che valorizzano il design  
Des innovations technologiques qui valorisent le design  
Technologische Innovationen, die das Design aufwerten

HiSense

**HiSense and RST technologies transform ceramics into a unique experience. Thanks to its microparticles, HiSense makes the surface softer to the touch while also improving its anti-slip performance, whereas RST digital engravings reproduce natural details with extraordinary precision.**

Le tecnologie HiSense e RST trasformano la ceramica in un'esperienza unica. HiSense, grazie a microparticelle, rende la superficie più morbida al tatto migliorandone anche le prestazioni antiscivolo, mentre le incisioni digitali di RST restituiscono i dettagli naturali con precisione straordinaria.

Les technologies HiSense et RST transforment la céramique en une expérience unique. Grâce à ses microparticules, HiSense rend la surface plus douce au toucher tout en améliorant ses performances antidérapantes, tandis que les gravures numériques RST reproduisent les détails naturels avec une précision extraordinaire.

Die HiSense- und RST-Technologien verwandeln Keramik in ein einzigartiges Erlebnis. Dank seiner Mikropartikel sorgt HiSense für eine weichere Oberfläche und verbessert gleichzeitig deren Rutschfestigkeit, während die digitalen Gravuren von RST natürliche Details mit außergewöhnlicher Präzision wiedergeben.

**Energieker elevates the tactile and visual experience of ceramic surfaces with Flow and Groove, two three-dimensional textures that give depth and character to environments. The reliefs enhance the graphics, creating suggestive plays of light and shadow.**

Energieker eleva l'esperienza tattile e visiva delle superfici ceramiche con Flow e Groove, due texture tridimensionali che donano profondità e carattere agli ambienti. I rilievi valorizzano le grafiche, creando suggestivi giochi di luci e ombre.

Energieker élève l'expérience tactile et visuelle des surfaces céramiques avec Flow et Groove, deux textures tridimensionnelles qui donnent de la profondeur et du caractère aux environnements. Les reliefs rehaussent les graphismes, créant de suggestifs jeux d'ombre et de lumière.

Energieker steigert das haptische und visuelle Erlebnis von Keramikoberflächen mit Flow und Groove, zwei dreidimensionalen Texturen, die Tiefe und Charakter verleihen. Die Reliefs werten die Grafiken auf und erzeugen suggestive Licht- und Schattenspiele.

**Energieker 6 mm ceramic slabs combine innovation and sustainability, offering surfaces an uncompromising elegance. Ideal for different types of applications, they maintain the performance of porcelain stoneware, allowing installation even on pre-existing floors.**

Le lastre ceramiche da 6 mm Energieker combinano innovazione e sostenibilità, offrendo alle superfici un'eleganza senza compromessi. Ideali per diversi tipi di applicazione, mantengono intatte le prestazioni del gres porcellanato, consentendo la posa anche su pavimenti preesistenti.

Les dalles céramiques Energieker de 6 mm allient innovation et durabilité, offrant aux surfaces une élégance sans compromis. Idéales pour différents types d'applications, elles conservent les performances du grès cérame, permettant la pose même sur sols préexistants.

Die 6 mm starken Keramikplatten von Energieker vereinen Innovation und Nachhaltigkeit und bieten Oberflächen einer kompromisslosen Eleganz. Ideal für verschiedenste Arten von Anwendungen, behalten sie die Leistung von Feinsteinzeug bei und ermöglichen die Verlegung auch auf bereits vorhandenen Böden.

**For us, sustainability is a concrete concept: over 5 MW/h of self-produced energy, 100% recycling of water and processing waste, international certifications, safety in the workplace, attention to the well-being of employees, logistics center. All this translates into a sustainable presence in the area and into a virtuous circle between company, designers, customers and end users.**

Per noi la sostenibilità è un concetto concreto: oltre 5 MW/h di energia autoprodotta, riciclo del 100% dell'acqua e degli scarti di lavorazione, certificazioni internazionali, sicurezza sul luogo di lavoro, attenzione al benessere dei dipendenti, polo logistico. Tutto questo si traduce in una presenza sostenibile sul territorio e in un circolo virtuoso tra azienda, progettisti, clienti e utilizzatori finali.

Pour nous, la durabilité est un concept concret: plus de 5 MW/h d'énergie autoproduite, recyclage à 100 % de l'eau et des déchets de traitement, certifications internationales, sécurité sur le lieu de travail, attention au bien-être des employés, centre logistique. Tout cela se traduit par une présence durable sur le territoire et par un cercle vertueux entre entreprise, designers, clients et utilisateurs finaux.

Nachhaltigkeit ist für uns ein konkretes Konzept: über 5 MW/h Energie selbst erzeugt, 100 % Recycling von Wasser und Produktionsabfällen, internationale Zertifizierungen, Sicherheit am Arbeitsplatz, Aufmerksamkeit für das Wohlbefinden der Mitarbeiter, Logistikzentrum. All dies führt zu einer nachhaltigen Präsenz in der Region und zu einem positiven Kreislauf zwischen Unternehmen, Designern, Kunden und Endverbrauchern.

# A concrete commitment to sustainability

Composition 4

The image shown is for illustrative purposes only. As with natural marble slabs, Bookmatch patterns may present vein discontinuities between one slab and another. For this reason, differences of up to 1.5 cm are to be considered normal product characteristics. L'immagine rappresentata è a puro scopo illustrativo. Come per le lastre di marmo naturale, anche le grafiche Bookmatch possono presentare discontinuità tra una lastra e l'altra. Per questa ragione, differenze fino a 1,5 cm sono da considerarsi normali caratteristiche del prodotto.

## Bookmatch.

Composition 1

Composition 2

Composition 3

Composition 4

The image shown is for illustrative purposes only. As with natural marble slabs, Bookmatch patterns may present vein discontinuities between one slab and another. For this reason, differences of up to 1.5 cm are to be considered normal product characteristics. L'immagine rappresentata è a puro scopo illustrativo. Come per le lastre di marmo naturale, anche le grafiche Bookmatch possono presentare discontinuità tra una lastra e l'altra. Per questa ragione, differenze fino a 1,5 cm sono da considerarsi normali caratteristiche del prodotto.

## Bookmatch.

Composition 1

Composition 2

Composition 3

Composition 4

The image shown is for illustrative purposes only. As with natural marble slabs, Bookmatch patterns may present vein discontinuities between one slab and another. For this reason, differences of up to 1.5 cm are to be considered normal product characteristics. L'immagine rappresentata è a puro scopo illustrativo. Come per le lastre di marmo naturale, anche le grafiche Bookmatch possono presentare discontinuità tra una lastra e l'altra. Per questa ragione, differenze fino a 1.5 cm sono da considerarsi normali caratteristiche del prodotto.

## Bookmatch.

Composition 1

Composition 2

Composition 3

Composition 4

The image shown is for illustrative purposes only. As with natural marble slabs, Bookmatch patterns may present vein discontinuities between one slab and another. For this reason, differences of up to 1.5 cm are to be considered normal product characteristics. L'immagine rappresentata è a puro scopo illustrativo. Come per le lastre di marmo naturale, anche le grafiche Bookmatch possono presentare discontinuità tra una lastra e l'altra. Per questa ragione, differenze fino a 1,5 cm sono da considerarsi normali caratteristiche del prodotto.

**Special pieces available for all series.**  
**The round edge has the natural color of the body.**  
**It does not match the color of the glazed surface.**

Pezzi speciali disponibili su tutte le serie.  
Il bordo arrotondato è del colore naturale del supporto, di conseguenza differente dal colore della superficie smaltata del prodotto.

Pièces spéciales disponibles pour toutes les séries.  
Le bord arrondi présente la couleur du support du produit, donc il est différent de la couleur de la surface émaillée.

Formteile für alle Serien erhältlich.  
Bei Sonderteilen für den Schwimmbadrand ist die abgerundete Kante die in der Farbe des Scherbens und damit unterscheidet sich die bearbeitete Kante von der dekorierten Oberfläche der Platten.

# Maximum laying versatility

Massima versatilità di posa  
Polyvalence maximale d'installation  
Vielfaltigkeit der Verlegung

## A LAYING ON GRASS

POSA SU ERBA  
POSE SUR HERBE  
VERLEGUNG AUF GRAS

**A rapid, advantageous system. Just one tip: the underlying surface should be covered with stabilised material and an appropriate distance should be left between the tiles to facilitate rainwater drainage.**

Un sistema rapido e vantaggioso. Solo un accorgimento: si consiglia di coprire la superficie d'appoggio con stabilizzato e lasciare una distanza opportuna tra le mattonelle per rendere più agevole il deflusso dell'acqua piovana.

Un système rapide et avantageux. Un conseil seulement: il est recommandé de couvrir la surface d'appui avec un matériau stabilisé et de laisser une distance opportune entre les carreaux pour rendre plus simple l'écoulement de l'eau de pluie.

Ein schnelles, vorteilhaftes System. Wir empfehlen nur eine Vorkehrung: Bedecken Sie die Auflagefläche mit Schutt und lassen Sie ausreichend Abstand zwischen den Fliesen, um das Abfließen des Regenwassers zu erleichtern.

## C LAYING ON SAND

POSA SU SABBIA  
POSE SUR SABLE  
VERLEGUNG AUF SAND

**Eco-friendly, economical and fast, ideal for a floor you can walk on immediately, and which is easy to remove if required.**

Eco-friendly, economica e veloce consente di ottenere un pavimento immediatamente calpestabile sulla sabbia, nonché di procedere alla sua rimozione in caso di necessità.

Éco-friendly, économique et rapide, elle permet d'obtenir un sol immédiatement carrossable sur le sable, ainsi que de procéder à son retrait en cas de nécessité.

Ökologisch, preisgünstig und schnell: Man kann damit einen sofort betretbaren Fußboden auf Sand verlegen und ihn bei Bedarf einfach entfernen.

## E POSA SOPRAELEVATA

RAISED INSTALLATION  
POSE SURÉLEVÉE  
VERLEGUNG ALS DOPPELBODEN

## B LAYING ON GRAVEL

POSA SU GHIAIA  
POSE SUR GRAVIERS  
VERLEGUNG AUF KIES

**A quick laying system that makes it possible to handle TH2 independently, without the expense of specialised installers, as well as being eco-compatible, because it does not require screed, mortars or adhesives.**

Sistema di posa veloce, permette di gestire il TH2 in autonomia, senza l'impiego di oneroso personale specializzato, ed ecocompatibile, poiché non necessita di massetto malte e collanti.

Système de pose rapide qui permet de gérer le TH2 en toute autonomie, sans l'utilisation d'un personnel spécialisé onéreux et de manière éco-compatible, car ni mortier, ni adhésif, ni colle ne sont nécessaires.

Schnelles Verlegesystem, mit dem man TH2 selbstständig ohne Einsatz von kostenaufwendigem Fachpersonal verlegen kann. Außerdem ist es umweltverträglich, da man weder Estrich noch Mörtel und Kleber benötigt.

## D LAYING ON SCREED

POSA SU MASSETTO  
POSE SUR MORTIER  
VERLEGUNG AUF ESTRICH

**Even the most traditional laying system can be used, by spreading glue on screed. This technique guarantees maximum stress resistance, so as to render surfaces perfectly suitable for vehicular traffic.**

Non è escluso nemmeno il più classico dei metodi di posa, quello con l'utilizzo della colla su massetto, tecnica che garantisce la massima resistenza alle sollecitazioni, in modo da rendere le superfici perfettamente carrabili.

Même la plus classique des méthodes de pose n'est pas exclue, celle de l'utilisation de la colle sur mortier, une technique qui garantit la résistance maximale aux sollicitations de manière à rendre les surfaces parfaitement carrossables.

Auch die klassische Verlegungsmethode unter Verwendung von Kleber auf dem Estrich ist nicht ausgenommen. Es handelt sich dabei um eine Technik, die die größtmögliche Beständigkeit gegenüber den Belastungen gewährleistet, damit die Oberfläche perfekt befahrbar ist.

Technical information

# Raised installation: supports

Posa sopraelevata: supporti. Pose surélevée: supports. Erhöhte installation: support.

For raised installation, it is necessary to use polypropylene bearing supports, either fixed, adjustable or self-levelling, which can be placed at a variety of heights. The gap between the floor and the underlying surface allows for the passage of electric and plumbing systems.

Per la posa sopraelevata ci si serve di supporti portanti in polipropilene, siano essi fissi, regolabili o autolivellanti, collocabili a diverse altezze. L'intercapedine presente tra la pavimentazione e il piano d'appoggio permette il passaggio di impianti elettrici e idrici.

Pour la pose surélevée sont nécessaires des supports portants en polypropylène, que ceux-ci soient fixes, réglables ou auto-nivelants, et positionnables à différentes hauteurs. L'espace présent entre le sol et le plan d'appui permet le passage d'installations électriques et hydriques.

Für die Verlegung als Doppelboden verwendet man eine Tragstruktur aus Polypropylen-Stützen, die fest, verstellbar oder selbstnivellierend sind und in verschiedenen Höhen errichtet werden können. Der Zwischenraum zwischen dem Fußboden und der Auflagefläche ermöglicht die Durchführung der Strom- und Wasserleitungen.

## WATER RUNOFF ON RAISED FLOORS:

Thanks to the properties of porcelain stoneware, Energieker TH2.0 products have practically no water absorption, making them resistant to frost.

Please note that this characteristic can lead to water stagnation mainly located on the edges of the slabs, not attributable to the quality of the tiles, but to the physical phenomenon of surface tension together with low water absorption.

For correct water flow, installation with a minimum slope of 2% is recommended.

## DEFLUSSO DELLE ACQUE SU POSE SOPRAELEVATE:

Grazie alle proprietà del gres porcellanato, i prodotti Energieker TH2.0, hanno un assorbimento d'acqua praticamente nullo, rendendoli ingelivi. Si ricorda che tale caratteristica può comportare ristagni d'acqua localizzati principalmente sui bordi delle lastre, non imputabili alla qualità delle piastrelle, ma al fenomeno fisico della tensione superficiale unitamente al basso assorbimento dell'acqua. Per un corretto deflusso dell'acqua si consiglia la posa con una pendenza minima di 2%.

## ÉCOULEMENT DES EAUX SUR POSES SURÉLEVÉES:

Grâce aux propriétés du grès cérame, les produits Energieker TH2.0 n'ont pratiquement aucune absorption d'eau, ce qui les rend résistants au gel. Veuillez noter que cette caractéristique peut entraîner une stagnation d'eau principalement localisée sur les bords des dalles, non pas attribuable à la qualité des carreaux, mais au phénomène physique de tension de surface associé à une faible absorption d'eau.

Pour un bon écoulement de l'eau, il est recommandé une installation avec une pente minimale de 2%.

## WASSERABFLUSS BEI VERLEGUNG ALS HOHLRAUMBÖDEN:

Dank der technischen Eigenschaften von Feinsteinzeug haben Energieker TH2.0-Produkte praktisch keine Wasseraufnahme und gelten daher als absolut frostsicher. Bitte beachten Sie, dass aufgrund dieser Eigenschaft keine Flüssigkeit von den Platten aufgenommen werden kann und sich diese an den Plattenkanten sammeln können.

Dies beeinträchtigt keinesfalls die Qualität der Fliesen, sondern ist auf Oberflächenspannungen von Flüssigkeiten zurückzuführen.

Für einen erleichterten Wasserabfluss wird deshalb eine Verlegung mit einem Mindestgefälle von 2% empfohlen.

## ADVANTAGES

### VANTAGGI

**High stability thanks to the wide head of the support.**

Elevata stabilità grazie alla testa larga del supporto.

**Quick and easy installation.**

Installazione rapida e semplice.

**Respect for the waterproof membrane.**

Rispetto della membrana impermeabile.

**Allows the creation of a gap between the slabs and the wall to facilitate water drainage and stabilizes the terrace in case of heavy rain, snow, etc.**

Consente di creare un'intercapedine tra le lastre e il muro, per favorire lo scarico delle acque e stabilizza la terrazza in caso di forti piogge, neve, ecc.

**Presence of open joints that prevent the risk of cracking compared to grouted joints. Simplified water drainage.**

Presenza di giunti aperti che evitano il rischio di fessurazione rispetto ai giunti stuccati. Evacuazione dell'acqua semplificata.

**Easy access to the waterproof membrane or the underlying structure.**

Accesso facile alla membrana impermeabile o alla struttura sottostante.

**Covering and protection of systems. Easy access for potential maintenance.**

Copertura e protezione degli impianti. Facile accesso per eventuali manutenzioni.

**Easy management of the slope up to 5%.**

Facile gestione della pendenza fino al 5%.

## Recommended support placement

Posizionamento consigliato dei supporti. Placement des supports recommandé. Empfohlene platzierung der stützen.

**\*\* For the installation of 10 cm or higher flooring, it is recommended to use an additional supporting tool at the centre of the slab.**

Per la posa di pavimentazioni con altezze superiori ai 10 cm si raccomanda l'utilizzo di un supporto supplementare al centro della lastra. Lors de la pose de carrelage de sol d'une hauteur supérieure à 10 cm, il est recommandé d'utiliser un support supplémentaire au centre de la dalle. Für die Verlegung von Böden mit einer Höhe von mehr als 10 cm wird empfohlen, eine zusätzliche Stütze in der Plattenmitte zu verwenden.

## Example of perimetral installation

Esempio di posa perimetrale. Exemple de pose périmétrique. Verlege beispiel mit einfassung.

**60x60**  
24"x24"

**60x120**

It is highly recommended to follow the above-mentioned suggestions, while complying to all relevant legislation in the country where goods are installed. Failure to respect these norms may cause severe safety issues.

Si raccomanda di seguire i suggerimenti sopra riportati unitamente al rispetto delle normative locali del paese in cui viene effettuata l'installazione. Il mancato rispetto di queste raccomandazioni potrebbe causare gravi problemi di sicurezza.

Il est recommandé de suivre les suggestions ci-dessus et de se conformer aux réglementations locales du pays d'installation. Le non-respect de ces recommandations peut entraîner de graves problèmes de sécurité.

Wir empfehlen, die o.g. Vorschläge in Einhaltung der örtlichen Vorschriften des jeweiligen Landes, in dem die Installation durchgeführt wird, zu befolgen. Die Nichtbeachtung dieser Empfehlungen kann zu ernsthaften Sicherheitsproblemen führen.

# Aluminium joists and reinforcement tools

Magatelli in alluminio e supporti. Lattes et supports en aluminium. Aluminiumprofile und support.

The system with aluminum profiles simplifies the installation of 20 mm ceramic slabs of any size. They guarantee superior resistance to applied loads and only require a distance of maximum 60 cm between each support.

Il sistema con i profili in alluminio semplifica la posa delle lastre in ceramica da 20 mm di qualunque dimensione. Garantiscono una resistenza superiore ai carichi applicati e necessitano soltanto di una distanza di 60 cm (max) tra ogni supporto.

Le système de profilés en aluminium simplifie l'installation de dalles céramiques de 20 mm, quelle que soit leur taille. Ils offrent une résistance supérieure aux charges appliquées et ne nécessitent qu'une distance de 60 cm (max.) entre chaque support.

Das System mit Aluminiumprofilen vereinfacht die Verlegung von 20 mm Keramikplatten beliebiger Größe. Sie garantieren eine hervorragende Widerstandsfähigkeit gegenüber den aufgetragenen Lasten und erfordern einen Abstand von (max.) 60 cm zwischen den einzelnen Stützen.

## POSITIONING OF THE CHOCKS POSIZIONAMENTO DEI MAGATELLI

## ADVANTAGES VANTAGGI

**Time-saving advantage.**  
Vantaggio di tempo.

**Simplified installation of supports.**  
Posa semplificata dei supporti

**Possibility of laying oversized slabs/boards.**  
(e.g. large format 120x120 cm or reduced width 20x120, 30x120 cm).

Possibilità di posa di lastre/tavolati fuori formato.  
(es. formato grande 120x120 cm o ridotta larghezza 20x120, 30x120 cm).

**Great stability of passage surfaces.**  
Grande stabilità delle superfici di passaggio.

**Stability of slabs at the wall edge.**  
Stabilità lastre a bordo muro.

**Quick attachment of the support to the chock.**  
Aggancio rapido del supporto al magatello.

**EPDM seal.**  
Guarnizione in EPDM.

REGULATIONS AND RECOMMENDATIONS FOR RAISED FLOORS - There are currently no regulations governing raised floors for outdoor use only. The only pertinent regulation is UNI EN 12825 "raised flooring" of August 2001, the exclusive field of application of which is "raised floors for which the main use contemplated is internal finishings of buildings". With reference to this regulation, the TH2 system is able to comply with the performance requisites set out in the table. Although the "Dynamic load - hard object impact" test reproduces unlikely situations, such as the fall of a 4,5 kg weight from a height of 60 cm, EnergieKer recommends carefully evaluating the type and height of the structure, based on the intended use, and that the raised floor should have a maximum height of 10 cm.

NORME VIGENTI E RACCOMANDAZIONI PER LA SOLA POSA SOPRAELEVATA - Ad oggi, non esiste alcuna norma relativa ai pavimenti sopraelevati ad uso esclusivo per esterni. L'unica normativa di riferimento è la UNI EN 12825 "pavimenti sopraelevati" dell'agosto 2001 che, nel proprio ed esclusivo campo di applicazione, è destinata a "pavimenti sopraelevati per i quali l'utilizzo principale previsto è la finitura interna di edifici". Con riferimento a tale norma, il TH2 è in grado di soddisfare i requisiti prestazionali riportati nella tabella. Nonostante il test "Carico dinamico - prova di urto di corpi duri" riproduca situazioni inconsuete, come la caduta di un peso di 4,5 kg da 60 cm di altezza, EnergieKer raccomanda di valutare attentamente la tipologia e l'altezza della struttura in base alla destinazione d'uso e di realizzare una posa sopraelevata di altezza massima di 10 cm.

NORMES EN VIGUEUR ET RECOMMANDATIONS POUR LA POSE SURÉLEVÉE UNIQUEMENT - Il n'existe actuellement aucune norme relative aux sols surélevés pour l'utilisation exclusive en extérieur. L'unique norme de référence est l'UNI EN 12825 "sols surélevés" du mois d'août 2001 qui, dans son domaine unique et exclusif d'application, est destinée aux "sols surélevés pour lesquels l'utilisation principale prévue est la finition interne de bâtiments". En référence à cette norme, le TH2 est en mesure de satisfaire les conditions performances indiquées dans le tableau. Bien que le test "Charge dynamique - essai de choc de corps durs" reproduise des situations inhabituelles, comme la chute d'un poids de 4,5 kg de 60 cm de hauteur, EnergieKer conseille d'évaluer attentivement la typologie et la hauteur de la structure en fonction de sa destination d'utilisation et de réaliser une pose surélevée d'une hauteur maximum de 10 cm.

GÜLTIGE NORMEN UND EMPFEHLUNGEN SPEZIELL FÜR DIE VERLEGUNG ALS DOPPELBODEN - Bis jetzt gibt es keine Norm für ausschließlich für den Außenbereich vorgesehene Doppelböden. Die einzige Bezugsnorm ist die UNI EN 12825 „Doppelböden“ vom August 2001, die als ausschließlichem Anwendungsbereich für „Doppelböden, deren vorgesehene Hauptbestimmung in der Innenausstattung von Gebäuden besteht“ bestimmt sind. Unter Bezugnahme auf diese Norm ist TH2 fähig, die in der Tabelle angeführten Leistungsanforderungen zu erfüllen. Auch, wenn der Test „Dynamische Belastung - Aufprallprüfung mit harten Schlagkörpern“ ungewöhnliche Situationen wie den Aufprall eines 4,5 kg-Gewichts aus 60 cm Höhe simuliert, empfiehlt EnergieKer, die Typologie und Höhe der Struktur sorgfältig je nach der Gebrauchsbestimmung zu wählen und den Boden in höchstens 10 cm Höhe zu verlegen.

# Installation advice

Consigli di posa. Conseils de pose. Verlegehinweise.

Verlegen Sie die Fliesen wie folgt:

1. NO CLAIMS WILL BE ACCEPTED FOR LAID MATERIALS.

2. CHECK THE SHADE, WORKSIZE, SELECTION AND THE WARPAGE BEFORE LAYING THE MATERIAL.

3. ELECTRONIC MACHINES THAT SET THE WORKSIZE ARE CALIBRATED WITH A TOLERANCE OF 1.2 mm.

4. THE MATERIAL MUST BE LAID WITH A MINIMUM JOINT OF 3 mm. THE RECTIFIED MATERIAL MUST BE LAID WITH A MINIMUM JOINT OF 2 mm. The "Campigiane" series (thin paving bricks) must be laid with a joint of 5 mm.

#### RECOMMENDATIONS FOR INSTALLATION

When setting the tiles, pls chec tone, caliber and choice. Our material is deliberately produced and chosen with slight differences in shade which underline the colour effect it is absolutely necessary to use tiles from different boxes when installing. The use of material different from the order or defective means acceptance of the quality characteristics of the goods and excludes complaints. Complaints about material already installed will not be accepted.

#### INSTALLATION SUGGESTIONS FOR ALL RECTANGULAR FORMATS IN THE CATALOGUE

You will find a few suggestions for making the most of the product at the installation stage. A basic strategy to adopt when laying our product is to carefully alternate the different shades taking the tiles three or four at a time from at least five different boxes. Harmoniously distribute the various shades that are most striking and check the result from time to time, surveying the section of work done, from a suitable distance. The materials should be checked before installation and put aside if they are defective because no compliants will be accepted that have already been installed.

#### INSTALLATION OF RECTIFIED MATERIALS

For the installation of rectified materials it is anyway essential to keep a gap between the tiles of at least 2/3 mm. Using grouts and sealers that are colour co-ordinated with the material. When laying rectangular rectified material, it is important to avoid placing the edges of each tile next to the halves of others in order to compensate for any imperfections in flatness that are, however, always present in large sizes. As this is cut and rectified material to avoid the problem it is recommended to lay the material in a straightforward design with an interval from 0 to 15 cm. Between each tile as per the pattern shown below. It is highly suggested to have the installation done by qualified experts who, after checking the proper flatness of the concrete slab and the quality of the material, will contribute to carrying out of the job flawlessly.

#### WASHING AFTER INSTALLATION

Washing after installation is a very important, fundamental phase for all later interventions and for the maintenance. The following is achieved by washing after the installation:

- Remove installation residue (mortar, adhesive, paint and various types of dirt in general).

- Remove any residue from the surface of the material.

It's an important fact to know that over 90% of claims in building sites are due to a bad washing procedure or even due to the lack of washing after installation.

#### WATER RUNOFF ON RAISED FLOORS:

We recommend you give the floor a slight slope (at least 1%).

We recommend you use metal clips to fasten each slab in order to break the surface tension of the water in the event of pooling, thereby aiding runoff.

We recommend that you always use a central support for every floor tile laid.

# Cleaning and care of Energieker products

Pulizia e manutenzione dei prodotti. Nettoyage et entretien des articles Energieker.  
Reinigung und pflege der produkte von Energieker.

Apart from their refined aesthetic presence, all surfaces by Energieker provide you with the highest technical standards. Easy to clean, spot-resistant and resistant to contact with acids. For any further question on how to obtain the best results in cleaning, to find out more about the chosen surface and its relative cleansers and cleaning procedures, please scan the QR code on the right.

Le superfici Energieker oltre ad una presenza estetica raffinata garantiscono standard tecnici di assoluto valore. Facili da pulire, resistono alle macchie e non si deteriorano al contatto con acidi. Per ottenere i migliori risultati nella pulizia e avere informazioni relative al tipo di finitura scelto, sulle corrette procedure e adottare il tipo di detergente adatto inquadra il QR Code a fianco.

Les surfaces Energieker garantissent une présence esthétique raffinée ainsi que des standards techniques d'une valeur absolue. Ils sont faciles à nettoyer, résistent aux taches et ne se détériorent pas au contact des acides. Pour obtenir les meilleurs résultats et des informations sur le type de finition choisi, les procédures correctes et le bon type de détergent, scannez le code QR ci-contre.

Die Energieker-Oberflächen garantieren neben einer edlen ästhetischen Präsenz technische Standards von absoluter Wertigkeit. Sie sind leicht zu reinigen, Fleckbeständig und Säurefest. Scannen Sie den QR-Code auf der Seite, um Tipps für beste Reinigungsergebnisse zu erhalten und Informationen zur Oberflächenbehandlung, sowie den richtigen Reinigungsmitteltyp zu erhalten.

# General terms of sale

Condizioni generali di vendita. Conditions générales de vente. Allgemeine verkaufsbedingungen.

## General information

**WARNING** - The colours and aesthetic features of the products in this catalog and in all merchandising tools are indicative and cannot be reproduced on printed paper with utmost fidelity.

**APPROVAL** - All orders that we receive are considered to be binding only after our written confirmation has been issued.

**DELIVERY** - The materials are intended as delivered upon loading at our warehouses. All transport risks, including missing pieces, breakage, deterioration and tampering are the sole responsibility of the Client, even if the price agreed upon is carriage free, FOB, or C&F. Agreements with forwarding agents are intended as concluded in the name of and on behalf of the Client, who hereby confirms and accepts their terms and conditions.

**TERMS OF DELIVERY** - The terms of delivery are indicative, eventual delays in the delivery, interruptions, or total or partial suspensions of the supply do not allow any right to compensation for damages.

**DISPUTES** - The guarantee of the goods is limited only and exclusively to first choice materials. The difference in shades of color cannot be declared as a material defect. Eventual complaints regarding the quality or the type of material must be submitted within 8 days from the date of delivery. The purchaser agrees to make available the disputed lots in order that the declared defects may be controlled. In any case, the installation exonerates the manufacturer from any liability. Eventual manufacturing defects or quality defects in the goods, when declared according to law and ascertained or recognized, give right only to the replacement of the defective materials, provided that the goods have been returned previously and the written authorization of the return operation has been issued, the resolution of the contract as well as any compensation for damages is peremptorily waived and excluded.

**DIMENSIONS AND TONALITY** - Our materials are classified as products fired at high temperatures and as such may present discrepancies between the dimensions declared and those actually delivered. The same applies for differences in colors within the same production lot. Therefore, the client may not present a dispute regarding abovementioned product characteristics.

**PACKAGING AND QUANTITY** - The good condition of the packaging and cartons as well as the quantity delivered are verified upon acceptance of the goods by the forwarding agent. The forwarding agent declares himself responsible for the condition and quantity of the goods upon signing the packing list. In case of missing pieces or breakage, the purchaser must ask for eventual damages or compensation from the forwarding agent.

**RETURNS** - For no reason will the purchaser be able to return the material without our express prior written authorization and provided that the material is in good condition. All the costs related to the authorized return will be assumed by the Client. In case of a return, authorized in writing only, of empty packaging for big size (crates and/or A-frames) in good conditions, a maximum of 80% of the initial value charged will be reimbursed due to depreciation.

**CANCELLATIONS** - Order cancellations will not be accepted if the material has already been produced or if the production has already begun, and more so if the materials have already been shipped. In any case, the Client is obliged to pay the entire sum of the supply if the order is cancelled. If the acceptance of the cancellation is feasible, the Client will be peremptorily obliged to reimburse all the expenses sustained by the producer up to that moment.

**PRICES** - The prices on our price list are not binding. We reserve the right to modify prices before accepting an order.

**PAYMENT** - Payments must be made only in our main office. Delays of more than 10 days for each payment due or insufficient funds during the same term of a check, whether endorsed or transferred, or issued by the customer, constitutes bad debt. In this case, we reserve the right to suspend supply and cancel all ongoing relations, immediately require total payment of all ongoing relations; require total payment of each credit and to make legal recourse, whether executive or precautionary, as well as request compensation for damages. Annual penalty interest will accumulate on the expired debt to be calculated according to the current legal interest rate, plus 5%.

**MINIMUM PACKAGING REQUIREMENTS** - Sales of less than one box will not be allowed.

**DELIVERY SERVICE TO OUR DEPOSIT IN MARANELLO** The service to our warehouse in Maranello will be charged as follows: - from 0 to 1000 Kg € 4.00 - from 1000 to 8000 Kg €0.90 per quintal.

**SELLER'S LIEN** - The material, even if shipped and regularly invoiced, remains our property until payment in full of the invoice itself, even in case of passage or sale to third parties.

**V.A.T.** - Must be paid in any case before and no later than 60 days from the issuing of the invoice.

**PLACE OF JURISDICTION** - For any eventual dispute, the only place of jurisdiction will be the Court of Modena.

### IT

**AVVERTENZA** - I colori e le caratteristiche estetiche dei prodotti nel presente catalogo e in tutti gli strumenti di merchandising sono indicativi in quanto non riproducibili su carta stampata con assoluta fedeltà.

**APPROVAZIONE** - Gli ordini pervenuti ci sono per noi impegnativi solo dopo la nostra conferma scritta.

**CONSEGNA** - La consegna del materiale s'intende avvenuta a carico

effettuato presso i nostri magazzini. “Tutti i rischi di trasporto, compresi ammanchi, rotture, deterioramenti e manomissioni sono a carico del Committente anche se il prezzo pattuito è franco di porto, FOB o C&F. Gli accordi con spedizionieri s'intendono sempre conclusi in nome e per conto del Committente che ne accetta l'operato.

**TERMINI DI CONSEGNA** - I termini di consegna hanno carattere indicativo, eventuali ritardi nelle consegne, interruzioni, sospensioni totali o parziali delle forniture non daranno diritto ad indennizzi o risarcimento danni.

**CONTESTAZIONI** - La garanzia della merce e limitata al solo, ed esclusivamente, materiale di prima scelta. Le differenze di tonalità non potranno essere denunciate come vizio del materiale. Eventuali reclami in merito alla qualità, tipo del materiale, dovranno pervenirci entro 8 giorni dalla data della consegna. Il compratore s'impegna a tenere a disposizione le partite contestate così da consentire il controllo dei difetti denunciati, in ogni caso la posa in opera ci esonerà da qualsiasi responsabilità. Eventuali vizi o difetti di qualità della merce, ove siano denunciati nei termini di legge ed accertati o riconosciuti, danno diritto solamente alla sostituzione dei materiali difettosi, a condizione della preventiva restituzione delle merci contestate, e, su autorizzazione scritta dell'operazione di resa, restando tassativamente ed esclusi la risoluzione del contratto qualsiasi risarcimento danno.

**DIMENSIONI E TONALITÀ** - I nostri materiali sono da classificarsi fra i prodotti cotti a alta temperatura e come tali possono presentare differenze fra le dimensioni dichiarate e quelle effettivamente consegnate. Così si dica per le differenze di tono all'interno della medesima partita. Quanto sopra perciò non potrà essere oggetto di reclamo da parte del committente.

**IMBALLO E QUANTITÀ** - Il buono stato degli imballi e della loro confezione nonché della quantità consegnata resta accertato con l'accettazione della merce da parte del vettore. Quest, firmando la Bolla di Accompagnamento, si rende responsabile del buono stato del materiale e del quantitativo. Il compratore nel caso si verifichino rotture ed ammanchi dovrà chiedere eventuali danni o risarcimenti al vettore.

**RESI** - Per nessuna ragione l'acquirente potrà restituire il materiale senza nostra espresa preventiva autorizzazione scritta e a condizione che il materiale sia in buono stato. Tutte le spese connesse al reso autorizzato sono a carico del Committente.

In caso di reso da noi autorizzato per iscritto, di imballaggi in buono stato vuoti per grandi formati (casse e/o cavalletti), verrà riconosciuto al massimo l'80% del valore iniziale addebitato causa deperimento.

**ANNULLAMENTI** - Non verranno accettati annullamenti di ordini se il materiale e già stato prodotto o se e già stata avviata la lavorazione e molto più se e già stata effettuata la spedizione. L'annullamento dell'ordine comporterà in ogni caso l'obbligo da parte del Committente di pagare l'intera fornitura. Nel caso che sia fattibile l'accettazione dell'annullamento il Cliente sarà tassativamente tenuto a rifondere tutte le spese sostenute dal produttore ino a quel momento.

**PREZZI** - I prezzi riportati sui nostri listini non sono per noi impegnativi. Ci riserviamo il diritto di modificarli prima dell'accettazione dell'ordine.

**PAGAMENTI** - I pagamenti devono essere effettuati solo presso la nostra sede, il ritardo di oltre 10 giorni di ogni pagamento dovuto, o la mancata copertura nel termine stesso di un titolo di credito, girato o ceduto, o emesso dal committente, costituisce grado di insolvenza. In tal caso sarà nostra facoltà di sospendere le forniture ed annullare ogni rapporto in corso; immediatamente esigere l'integrale pagamento di ogni rapporto in corso; esigere l'integrale pagamento di ogni nostro credito ed agire giudizialmente al riguardo, in via esecutiva o cautelare nonché per il risarcimento danni. Decorreranno sul debito scaduto gli interessi moratori annui calcolati nella misura del tasso legale corrente maggiorato di 5 punti percentuali.

**SCONFEZIONAMENTO IMBALLI** - Non si effettuano vendite inferiori alla scatola.
**SERVIZIO CONSEGNE FINO NOSTRO DEPOSITO A MARANELLO** Il servizio presso il nostro deposito di Maranello sarà addebitato alle seguenti tariffe: da 0 a 1000 Kg € 4,00 - da 1000 a 8000 Kg 0,90 /Quintale.

**RISERVATO DOMINIO** - Il materiale anche se spedito e regolarmente fatturato resta di nostra Proprietà fino al pagamento totale della fornitura medesima anche in caso di passaggio o vendita a terzi.

I.V.A. - Il pagamento della I.V.A. dovrà pervenire comunque entro e non oltre 60 giorni dalla data di emissione della fattura.

**FORO COMPETENTE** - Per qualsiasi controversia sarà esclusivamente competente il Foro di Modena.

### FR

**AVERTISSEMENT** - Les couleurs et les caractéristiques de l'apparence des produits dans ce catalogue et dans tous les outils de merchandising sont indicatifs car ils ne peuvent pas être reproduites en version imprimée avec une fidélité absolue.

**ACCEPTATION** - Les commandes parvenues ne seront valables de manière définitive qu'après confirmation écrite de notre part.

**LIVRAISON** - La livraison du matériel s'entend au moment du chargement effectué dans nos entrepôts. Tous les risques de transport, tels que les manques, casses, détériorations ou endommagements sont à charge de l'Acheteur, même lorsque le prix convenu est franco de port, FOB ou C&F. Les accords conclus avec les transporteurs s'entendent toujours au nom et pour compte de l'Acheteur qui confirme et accepte les conditions au préalable.

**DÉLAIS DE LIVRAISON** - Les délais de livraison ont un caractère indicatif; les éventuels retards de livraisons, interruptions, suspensions totales ou partielles des marchandises ne donneront droit à aucun dédommagement ou dommages et intérêts.

**CONTESTATIONS** - La garantie de la marchandise se limite seulement et exclusivement au matériel de premier choix. Les différences de tons ne pourront être dénoncées comme vice du matériel. Les éventuelles réclamations relatives à la qualité, au type de matériel, devront nous parvenir dans les 8 jours à partir du jour de livraison. L'acheteur s'engage à mettre à disposition les parties contestées de manière à permettre le contrôle des défauts déclarés, sachant que la pose nous libère quoiqu'il en soit de toute responsabilité. Les éventuels vices ou défauts de qualité de la marchandise, si déclarés en vertu des termes de loi et confirmés ou reconnus, ne donnent droit qu'à la substitution des matériels défectueux, à condition que les marchandises contestées ne soient restituées préalablement et, sur autorisation écrite de l'opération de restitution, en renonçant et en excluant ainsi de manière formelle la résolution du contrat tout comme les éventuels dommages et intérêts.

**DIMENSIONS ET TONS** - Nos matériels se classent parmi les produits cuits à haute température et peuvent présenter en tant que tels des différences entre les dimensions déclarées et celles effectivement livrées. C'est ainsi que sont considérées les différences de tons à l'intérieur d'un même lot. C'est pourquoi, en vertu des conditions présentées précédemment, ceci ne pourra faire l'objet d'aucune réclamation de la part de l'Acheteur.

**EMBALLAGES ET QUANTITÉS** - Le bon état des emballages et de leur confection, ainsi que de la quantité livrée est confirmé après acceptation de la marchandise de la part du transporteur. Ce dernier, en signant le Bon de Livraison, se tient responsable du bon état du matériel et de la quantité. En cas de casses ou manques, l'acheteur devra demander des éventuels dommages et intérêts ou dédommagements au transporteur.

**RETOUR** - En aucun cas l'acheteur ne pourra restituer le matériel sans préalablement recevoir une autorisation écrite et expresse de notre part ; tous les frais sont à charge de l'Acheteur. En cas de retour autorisé par écrit par nos soins, pour des emballages vides en bon état destinés aux grands formats (caisses et/ou chevalets), un maximum de 80% de la valeur initiale facturée sera reconnu en raison de la dépréciation.

**ANNULLATIONS** - Aucune annulation de commandes ne sera acceptée si le matériel a déjà été produit ou si la phase de production a déjà commencé, ni même si la livraison a déjà été effectuée. L'annulation de la commande comportera dans tous les cas l'obligation de la part de l'Acheteur de payer la totalité de la marchandise. Dès lors que l'acceptation de l'annulation est faisable, le Client sera formellement tenu à supporter tous les frais soutenus par le producteur jusqu'alors.

**PRIX** - Les prix reportés sur nos catalogues ne sont pas définitifs. Nous nous réservons le droit de les modifier avant l'acceptation de la commande.

**PAIEMENTS** - Les paiements ne doivent être effectués qu'après de notre siège. Le retard de plus de 10 jours de tout paiement dû ou la non couverture dans le même délai d'un titre de crédit, transféré ou cédé, ou bien émis par l'acheteur, constitue un niveau d'insolvabilité. Dans ce cas, il est en notre pouvoir de suspendre les marchandises et annuler tout rapport en cours; d'exiger le paiement intégral et immédiat de tout rapport en cours; d'exiger le paiement intégral de tout crédit en notre faveur et d'agir judiciairement à cet égard, de manière exécutive ou préventive ainsi que pour les dommages et intérêts. Les intérêts moratoires annuels calculés en fonction du taux d'intérêt légal en vigueur majoré de 5 points de pourcentage.

**DÉSEMBALLAGES** - Aucune vente inférieure à la boîte ne peut être effectuée.

**SERVICE LIVRAISONS JUSQU'A MARANELLO** - Le service aupres nos depot de Maranello sera debite sur la base des tarifs suivants: de 0 à 1000 kg 4,00 € - de 1000 à 8000 kg 0,90 €/quintal.

**RÉSERVE DE PROPRIÉTÉ** - Le matériel, même si livré et régulièrement facturé reste notre propriété jusqu'au paiement total de ladite marchandise, même en cas de passage ou vente à un tiers.

T.V.A. - Le paiement de la T.V.A. devra parvenir quoiqu'il en soit avant et non au-delà de 60 jours à partir de la date d'émission de la facture.

**TRIBUNAL COMPETENT** - Le Tribunal de Modena sera compétent de manière exclusive en cas de litige.

### D

**WARNHINWEIS** - Die Farben und ästhetische Eigenschaften der Produkte in diesem Katalog und in allen Verkaufsfördermittel sind Richtwerte, da sie nicht in gedruckter Form mit absoluter Treue wiedergegeben werden können.

**BESTÄTIGUNG** - Eingegangene Bestellungen sind für uns nur verbindlich, wenn sie schriftlich durch uns bestätigt wurden.

**LIEFERUNG** - Die Lieferung des Materials ist für uns mit dessen Beladung bei unserem Lager abgeschlossen. Alle durch den Transport bedingten Risiken, einschlichlich Fehlmengen, Bruch, Beschädigung und sonstige Beeinträchtigungen gehen zu Lasten des Auftraggebers, auch wenn der vereinbarte Preis frachtfrei, FOB oder C&F ist. Die Vereinbarungen mit den Speditionsunternehmen werden im Namen und auf Rechnung des Auftraggebers getroffen, der die Entlastung bestätigt und erteilt.

**LIEFERFRISTEN** - Die Lieferfristen sind ungefähre Angaben; im Falle einer Verzögerung, Unterbrechung bzw. teilweiser oder kompletter

Aussetzung der Lieferungen besteht kein Recht auf Entschädigung oder Schadenersatz.

**BEANSTANDUNGEN** - Die Garantie auf die Ware bezieht sich ausschließlich auf Material erster Wahl. Unterschiede bei Farbönen können nicht als Materialfehler geltend gemacht werden. Eventuelle Beanstandungen in Bezug auf die Qualität und Materialart müssen innerhalb von 8 Tagen ab dem Lieferdatum bei uns eingehen. Der Käufer verpflichtet sich, die beanstandeten Warenpartien für die Überprüfung der angezeigten Mängel zur Verfügung zu halten. Die Verlegung des Materials befreit uns in jedem Fall von jeglicher Haftung. Eventuelle Fehler oder Qualitätsmängel der Ware, sofern disse innerhalb der gesetzlich vorgeschriebenen Fristen gemeldet, überprüft und anerkannt wurden, beinhalten lediglich das Recht auf einen Umtausch der fehlerhaften Materialien, unter der Bedingung, dass die beanstandete Ware vorher, nach schriftlicher Genehmigung der Warenrückgabe, zurückgeschickt wurde und unter Verzicht und Ausschluss des Anspruchs auf eine Vertragsauflösung oder jegliphc Art von Schadenersatz.

**ABMESSUNGEN UND FARBTONE** - Unsere Materialien sind als Produkte klassifiziert, die bei hohen Temperaturen gebrannt werden, weshalb es sein kann, dass die tatsächlichen Abmessungen von den genannten Abmessungen abweichen. Das gleiche gilt für Farbunterschiede innerhalb desselben Warenpostens. Diese Umstände geben dem Auftraggeber kein Recht zu Beanstandungen.

**VERPACKUNG UND MENGE** - Mit Annahme der Ware durch das Beförderungsunternehmen gelten der gute Zustand der Verpackungen sowie die übergebene Warenmenge als bestätigt. Das Transportunternehmen übernimmt mit Unterzeichnung des Versandscheins die Verantwortung für den guten Zustand und die Menge des Materials. Der Käufer muss sich im Fall von Brüchen oder Fehlware für eventuelle Schäden oder Entschädigungen an das Beförderungsunternehmen wenden.

**WARENRÜCKGABE** - Der Käufer kann die Ware in keinem Fall ohne unsere ausdrückliche schriftliche Genehmigung zurückgeben; alle entstehenden Kosten werden vom Auftraggeber übernommen. Im Falle einer von uns schriftlich genehmigten Rücksendung von leeren Verpackungen in gutem Zustand für Großformate (Kisten und/oder Gestelle), wird maximal 80% des ursprünglich berechneten Wertes aufgrund von Wertminderung anerkannt.

**STORNIERUNGEN** - Auftragsstornierungen werden nicht akzeptiert, wenn das Material bereits hergestellt wurde, die Produktion angelaufen ist oder die Ware gar bereits verschickt wurde. Bei der Stornierung einer Bestellung ist der Auftraggeber in jedem Fall verpflichtet, die gesamte Lieferung zu bezahlen. Falls die Stornierung akzeptiert wird, ist der Kunde verpflichtet, alle Kosten zu übernehmen, die dem Hersteller bis zu diesem Zeitpunkt entstanden sind.

**PREISE** - Die in unserer Preisliste angegebenen Preise sind für uns nicht verbindlich. Wir behalten uns das Recht vor, diese vor der Bestellungsannahme zu ändern.

**ZAHLUNG** - Die Zahlungen können nur direkt an uns erfolgen. Eine Verspätung von mehr als 10 Tagen jeder geschuldeten Zahlung bzw. die fehlende Deckung eines girierten, abgetretenen oder vom Auftraggeber ausgestellten Kreditpapiers innerhalb desselben Zeitraums wird als Zahlungsunfähigkeit gewertet. In diesem Fall haben wir das Recht, die Lieferungen auszusetzen und jedes bestehende Geschäftsverhältnis abzubrechen; unverzüglich die vollständige Zahlung jedes bestehenden Auftrags zu fordern; die vollständige Zahlung aller unserer Forderungen im Rahmen eines Vollstreckungs- oder Sicherstellungsverfahrens rechtlich zu beanspruchen, ebenso wie eine Entschädigung. Auf den fälligen Betrag werden Verzugszinsen berechnet, die auf der Grundlage des aktuellen gesetzlichen Zinssatzes, erhöht um 5 Prozentpunkte, jährlich berechnet werden.

**VERPACKUNGSGRÖSSE** - Es werden keine Mengen unterhalb der Grde eines Kartons verkauft.

**LIEFERSERVICE BIS MARANELLO** - Fuer die Lieferungen nach Lager in Maranello werden wir folgende Kosten berechnen: von 0 bis 1000 kg 4,00 € - von 1000 bis 8000 kg 0,90 €/Zentner.

**EIGENTUMSVORBEHALT** - Das Material bleibt auch bei regulärem Transport und normaler Rechnungsstellung bis zur vollständigen Bezahlung der Lieferung in unserem Eigentum, auch im Falle der Weitergabe oder des Verkaufs an Dritte.

**MEHRWERTSTEUER** - Die Zahlung der Mehrwertsteuer hat in jedem Fall bis spätestens 60 Tage nach dem Ausstellungsdatum der Rechnung zu erfolgen.

**GERICHTSSTAND** - Gerichtsstand in Streitfällen ist ausschließlIch das Gericht Modena.

# Warning instructions

Avvertenze. Instructions. Hinweise.

## General information

### SEMI-POLISHING (LAPPATURA)

A) By the process of semi-polishing the more vetrified and resistant part of the tile (top layer but also on the edges) is partially removed. In this way the porosity of the tile increases reducing the stain resistance of the tile surface.

B) There is no long lasting protective treatment or chemical coverage. but it is possible to demand for a special waterproof treatment which must be applied repeatedly.

C) We do recommend to lay down semi-polished tiles only in private housing places.

D) We do recommend to use quality raw material (glues, adhesives and grouts) and, in particular, clean water to avoid the formation of stains or marks.

E) Immediately after the laydown it is recommended to cover the entire floor with sawdust and/or something else to avoid the rubbing/cracking caused by dirty shoes or furniture moving.

F) This process (LAPPATURA) might change the tonality of the material and/or make it vary. Therefore the shading effect is quite common.

### LAPPATURA

A) La lappatura consiste nell'asportare la parte più vetrificata e resistente della piastrella, sia superficiale che laterale (seguito rettifica dei bordi). In tal modo si determina un aumento della "porosità" della superficie e una riduzione della sua capacità di protezione dalle macchie.

B) Non esiste in commercio un trattamento protettivo duraturo nel tempo. Eventualmente è possibile fornire su richiesta uno speciale trattamento impermeabilizzante che deve essere ripetuto periodicamente.

C) Si raccomanda la posa di materiale lappato solo in ambienti residenziali (privati) e comunque poco trafficati.

D) Si raccomanda, per la posa, l'utilizzo di materie prime (colla e stucchi) di prima qualità e soprattutto di acqua pulita in modo da evitare il sorgere di aloni. Si consiglia inoltre, prima della stuccatura, l'utilizzo di un prodotto idrorepellente allo scopo di agevolare la pulizia.

E) Dopo la posa si deve coprire il pavimento con segatura e/o altro, in modo da evitare lo sfregamento causato da scarpe non pulite e dalla movimentazione del mobilio in fase di arredamento.

F) Il procedimento della lappatura stonifica il materiale. Pertanto una miscelazione dei toni, tipica delle pietre naturali, è sempre presente.

### LAPPATO

A) Le traitement de surface "Lappato" (aspect pierre polie), consiste à retirer la part la plus vitrifiée et résistante du carreau - tant au niveau de sa surface qu'au niveau latéral (du fait notamment de la rectification des bords). A ce niveau, on doit constater une augmentation du taux de porosité de la surface du carreau ainsi qu'une réduction de ses facultés de protection aux taches de toutes origines.

B) Aucun traitement de protection durable dans le temp n'existe aujourd'hui sur le marché. Il peut toutefois, être possible du fournir, sur demande spécifique, un traitement spécial imperméabilisant qui doit être régulièrement réalisé.

C) Nous recommandons la pose de ces carrelages "finition Lappato", uniquement dans les seuls environnements d'habitations (appartements et maisons) résidentiels, et de faibles trafics.

D) Au niveau de leur pose, nous recommandons, l'utilisation de matières premières (colles et joints) de toute première qualité, et surtout d'eau très claire et propre, sans impuretés, de façon à éviter toute apparition de résidus à la surface qui altèreraient le contact avec celle-ci.

E) Une fois le carrelage posé, il est nécessaire de le recouvrir avec de la sciure de bois ou tout autre protection, afin d'éviter tout endommagement de la surface par des chausseurs avec des semelles sales de terre et autres pierres, ou par le déplacement de meubles lors d'emménagements dans les pièces concernées.

F) Enfin, nous vous rappelons que le procédé de la "Finition Lappato" entraîne automatiquement une "détonalisation" de l'ensemble de la surface, avec par conséquent, un mélange de différents tonalités, typique des pierres vieillies naturelles; cet aspect de tonalités mélangées doit être accepté à l'avance par le client et surtout doit faire l'objet d'une information préalable très claire de la part du vendeur.

### TEILPOLITUR

A) Die Teilpolitur besteht in der Abführung des glásigsten und widestandfähigsten Teils der Fliese, oberflächlich und seitlich (durch Rektifizierung der Kanten). Dadurch entsteht eine Steigerung der "Porosität" der Oberfläche und somit eine Schutzminderung bezüglich der Flecke.

B) Im Handel leider existiert keine daürhafte Behandlung für den Schutz ev. ist es möglich, auf Anfrage eine Wasserdicht machende Behandlung zu liefern, die aber periodisch wiederholt werden muss.

C) Die Verlegung teilpolierter Materials ist nur in Wohnbereich zu empfehlen allerdings im wenig benutzten Räumen.

D) Für die Verlegung ist die Verwendung von Stoffen (Kleber und Fugenmaterial) erster Klasse und vor allem von Reinemwasser zu empfehlen, um die Entstehung von Fleckekreisen zu vermeiden.

E) Nach der Verlegung soll der Boden mit Sägemehl oder ähnlichem gedeckt werden, um vor der Trocknung die Verkratzung durch unsaubere Schu oder durch Versatz von der Möbel zu vermeiden.

F) Das Teilpolierungsverfahren nuanciert die Fliese, daher ist eine Mischung der Töne, tipisch für Natursteine, imer gegeben.

### PORCELAIN TILES IN 20 mm THICKNESS (TH2.0) FOR OUTDOOR FLOORS. RECOMMENDATIONS FOR THE INSTALLATION, CLEANING AND MAINTENANCE.

Gold Art recommends carrying out the procedures for the ordinary leaning of TH2.0 floor surfaces using water and commercially available neutral detergents: the inclination of the surface and the space between adjacent slabs for dry-system installation favour the natural flow of water.

However, it is important to take into consideration that any type of floor surface is subject to the surface tension effect of liquids: it is the same property of water that gives the tendency to transform into spherical droplets and which cause the curved top surface of a glass full of water.

The surface tension can obstacle the complete drainage of water and cause a temporary stagnation of liquid on the slab edges. In order to avoid this problem, Gold Art recommends ensuring adequate inclination of the surface during installation so as to encourage the flow of water between adjacent slabs. Should liquid deposit on the surface, it is recommended to push it towards grout lines using a brush or remove it with a wet and dry vacuum cleaner.

### TH2.0 - RACCOMANDAZIONI SULLA POSA, PULIZIA E MANUTENZIONE.

Gold Art consiglia di effettuare le operazioni di pulizia ordinaria delle superfici pavimentate con TH2.0 ricorrendo ad acqua e normali detersivi neutri: la pendenza della superficie e gli spazi tra le lastre nelle pose a secco facilitano il naturale deflusso delle acque.

Si consideri tuttavia che qualunque tipo di pavimentazione è soggetta al fenomeno della tensione superficiale dei liquidi: si tratta della stessa proprietà dell'acqua che le conferisce la tendenza a distribuirsi in gocce sferiche, o che causa la formazione della classica bombatura in un bicchiere pieno di acqua oltre il colmo.

La tensione superficiale può impedire un completo scolo dell'acqua, e causare lo stazionamento temporaneo di una patina di liquido in corrispondenza dei bordi delle lastre. Per ovviare a questo problema, Gold Art raccomanda di prevedere le opportune pendenze della superficie in fase di installazione, per facilitare il deflusso delle acque negli spazi tra le lastre. Se dovesse persistere una patina di acqua, si consiglia di spingerla verso le fughe con uno spazzolone, oppure di rimuoverla con un aspira liquidi.

### GRÉS CÉRAME EN 20 mm (TH2.0) D'ÉPAISSEUR POUR DES SOLS EXTÉRIEURS. CONSEILS SUR LA POSE, NETTOYAGE ET ENTRETIEN.

Gold Art conseille d'effectuer les opérations de nettoyage ordinaire des surfaces carrelées avec TH2.0 en utilisant de l'eau et des détergents neutres communs : l'inclinaison de la surface et les espaces entre les dalles dans les poses à sec facilitent l'écoulement naturel de l'eau.

Considérez cependant que tout type de sol est soumis au phénomène de la tension superficielle des liquides: il s'agit de la même propriété de l'eau qui lui donne la tendance à se répandre en gouttes sphériques, ou qui entraîne la formation classique de la surface bombée d'un verre d'eau rempli à ras bord.

La tension superficielle peut empêcher l'écoulement de l'eau, et causer la stagnation temporaire d'une légère patine d'eau au niveau des bords des dalles. Pour résoudre ce problème, Gold Art conseille de prévoir les pentes opportunes de la surface en phase d'installation, pour faciliter l'écoulement des eaux dans les espaces entre les dalles. Si la patine d'eau persiste, il est conseillé de la pousser vers les joints à l'aide d'une brosse à carrelage ou bien de l'éliminer avec un aspirateur à liquide.
**20 mm (TH2.0) STARKES FEINSTEINZEUG FÜR AUSSENBODENBELÄGE. EMPFEHLUNGEN FÜR DIE VERLEGUNG, REINIGUNG UND PFLEGE.**
Gold Art empfiehlt, zur normalen Reinigung der mit TH2 verlegten Flächen Wasser und normale, neutrale Reinigungsmittel zu verwenden; das Gefälle der Flächen und die im Trockenbau entstehenden Zwischenräume zwischen den Platten erleichtern das natürliche Abfließen des Wassers.

Auf jeder Art von Bodenbelag kommt es jedoch zur Oberflächenspannung der Flüssigkeiten; es handelt sich um ein Merkmal des Wassers selbst, das sich in runden Tropfen verteilt bzw. die klassische Wölbung in einem randvoll gefüllten Glas aufweist. Die Oberflächenspannung kann das vollständige Abflauen des Wassers behindern und dazu führen, dass sich vorübergehend Flüssigkeit an den Plattenrändern ansammelt.

Um dieses Problem zu vermeiden, empfiehlt Gold Art, bei der Installation für eine angemessene Neigung der Fläche zu sorgen, damit das Wasser über die Zwischenräume abflauen kann. Auf der Oberfläche stagnerendes Wasser sollte mit einer Bürste in die Zwischenräume gedrückt oder mit einem Allzsauger abgesaugt werden.

# Non-slip classification

Classificazioni antiscivolo. Classification antidérapant. Trittsicherheitsklassen.

## DIN 51097 (A+B+C)

German norm regarding the determination of the anti-slip characteristics in wet areas. The used method is trampling on a plane with variable sloping. The classification of the anti-slip characteristics on wet surface includes 3 groups: A - B - C.

Norma tedesca che prevede la determinazione delle proprietà anti-scivolo in zone bagnate. Il metodo adottato è il camminamento a piedi nudi su un piano ad inclinazione variabile dove viene fatta scorrere dell'acqua. La classificazione per le caratteristiche antidrucciolo su bagnato prevede 3 gruppi: A - B (A+B) - C (A+B+C).

Norme allemande qui définit les propriétés antidérapantes des surfaces humides. La méthode de mesure se base sur le piétinement à pieds nus d'une surface où ruisselle de l'eau, selon différentes pentes. La classe antidérapage des surfaces humides se divise en 3 groupes: A, B et C.

Deutsche Norm zur Messung der Rutschfestigkeit in Nassbereichen. Die vorgesehene Methode beinhaltet das Barfußgehen auf einer schiefen Ebene mit mehr oder minder großem Neigungswinkel, auf der Wasser als Gleitmittel verwendet wird. Im Hinblick auf die rutschhemmenden Eigenschaften in Barfußbereichen wird nach 3 Bewertungsgruppen unterschieden: A - B - C.

## DIN 51130 ANTISCIVOLOSITÀ R

R ANTI-SLIP = German norm measuring the determination of anti-slip resistance for working and operating place floors with slippery surfaces. The used method is trampling on a plane with variable sloping. The classification of the anti-slip characteristics includes 5 groups: R9-R10-R11-R12-R13.

Normativa tedesca che misura le determinazione della resistenza allo scivolamento per pavimentazioni di ambienti di lavoro e zone operative con superfici sdrucciolevoli Il metodo adottato è il calpestio su un piano ad inclinazione variabile. La classificazione per le caratteristiche antidrucciolo prevede 5 gruppi: R9-R10-R11-R12-R13.

ANTIDÉRAPAGE R = norme allemande qui détermine la résistance au dérapage des carrelages destinés aux lieux de travail et zones où des surfaces antidérapantes sont requises. La méthode de mesure adoptée est le piétinement de surface selon différentes pentes. La classe antidérapage se divise en 5 groupes: R9, R10, R11, R12 et R13.

RUTSCHFESTIGKEIT R = Deutsche Norm zur Messung der Rutschfestigkeit von Fußböden in Arbeitsräumen und -bereichen mit rutschigen Oberflächen. Die vorgesehene Methode beinhaltet das Gehen auf einer schiefen Ebene mit mehr oder minder großem Neigungswinkel. Im Hinblick auf die rutschhemmenden Eigenschaften wird nach 5 Bewertungsgruppen unterschieden: R9-R10-R11-R12-R13.

Table de travail  
Arbeitstisch

**In addition, the dimensions of the slabs require great caution and attention in all movements. For the 160x320 format the presence of four operators at the same time is compulsory and the slabs must be handled on the long side, in order to avoid bumps or excessive bending.**

Inoltre, le elevate dimensioni delle lastre richiedono grande cautela e attenzione in tutti gli spostamenti. Per il formato 160x320 è necessaria la presenza di quattro operatori contemporaneamente e la movimentazione della lastra deve sempre seguire il lato lungo, al fine di evitare urti o eccessive flessioni.

De plus, les dimensions élevées des dalles exigent beaucoup de prudence et d'attention dans tous les mouvements. Pour le format 160x320 est nécessaire la présence de quatre opérateurs à la fois et le mouvement de la plaque doit toujours suivre le côté long, à fin d'éviter des chocs ou une flexion excessive.

Außerdem erfordern die Dimensionen dieser Platten bei allen Bewegungen große Vorsicht und Aufmerksamkeit. Für das Format 160x320 sind zur Vermeidung großer Biegungen stets 4 Personen zur Bewegung oder Umlagerung der Platten notwendig und eine Umlagerung sollte immer mit entsprechender Unterstützung der langen Seite erfolgen.

**The dimensions and weight of the EKXTREME line require specific safety measures to allow operators to work safely and to avoid any possible breakages of the slabs.**

Dimensioni e peso dei formati della gamma **EKXTREME** richiedono apposite misure di sicurezza per consentire agli operatori di lavorare senza pericoli, evitando così possibili rotture delle lastre stesse.

Les dimensions et poids de la gamme **EKXTREME** nécessitent des mesures de sécurité spécifiques pour permettre aux opérateurs de travailler sans risques, évitant ainsi de possibles ruptures de plaques.

Maße und Gewichte der **EKXTREME**-Reihe erfordern spezifische Sicherheitsmaßnahmen damit die Bediener gefahrlos arbeiten können und ein eventueller Plattenbruch vermieden wird.

# Warning instructions EKXTREME

Avvertenze EKXTREME. Instructions EKXTREME. Hinweise EKXTREME.

## RECEIPT OF GOODS

- Check that the goods received tally with what is stated on the delivery document and the order.
- Check that the package is intact externally (no blows or visible signs of wear).
- Open the package and check at least the first slab (shade, appearance, quality class, size), as well as the condition of the material (the slabs must be handled according to the instructions provided).
- Please note that once laid, no claims can be laid concerning the appearance of the material (non-compliance) or for obvious defects.

### HANDLING

Significant and/or accidental blows can cause breakages in the material. Multiple slabs can only be stored and handled one on top of the other if they are the same size. Make sure that the slab (or part of it) is not placed on cut slabs or smaller scraps and always check that there are no spaces or gaps in the supporting surface/structure. Do not place other materials on top of the slabs. Take care during throughout the handling to prevent blows that could cause chipping and/or breakage of the slabs. During handling, each individual slab must be gripped carefully, with the gripper positioned centrally, and in compliance with the weight limits stated by the machine. When holding several slabs using a lifting beam, use the canvas sling with a cut-proof rubber cover, positioning the slabs carefully spaced apart and taking the necessary precautions. A wooden spacer (larger than the packet of slabs) should be placed at the bottom and at the top, against which the slings will rest so that the weight and tension are not exerted directly onto the slabs. Do not use steel cables or chains that could damage the surface and edges. The pieces obtained from processing can be sharp and must therefore be handled with care, using appropriate PPE.

When handling individual slabs (including those without holes,) movements must always be made with the slab upright. The cut material must be packed in crates equipped with protection for the corners and suitably thick shock-absorbing panels around the edges to protect the material in the event of a blow. Inadequate packaging of the material can result in breakages.

### SURFACE APPEARANCE

Check every single slab. The slabs are obtained by processing raw materials of a natural origin. The visual inspection must be carried out from a distance of 80 cm, positioned perpendicular to the surface and in natural light.

Slight flaws are deemed acceptable within the following limits:

- Spots (colour spots which are unrelated to the tile pattern and strongly contrasting with the background): up to 1 mm.
- Lumps on surface (slight colour contrast with the background): up to 3 mm in diameter and 1 mm thick with respect to the background.
- Black pinpoints up to 1mm in diameter are allowed.
- The concentration of spots of contrasting colour with a diameter of less than one millimetre is limited to 6 per square decimetre.
- For claims concerning flaws due to a lack of printing, there must be a continuous line on the material in order to be accepted. The visual inspection must be carried out from a distance of 80 cm, positioned perpendicular to the surface and in natural light.

### INSTALLATION

To enhance the characteristics of the product during installation, a basic precaution for laying our material is to carefully alternate the different shades by taking the material in groups of 3-4 tiles at a time from at least five different boxes. Spread the various clearly different colour shades evenly and check the result from time to time, inspecting an area of the laid material from a suitable distance.

For the installation of straightened-edge materials, it is always essential to maintain a minimum joint of 2/3 mm from one tile to another, using grouts and sealants in a colour which coordinates with the material. When laying rectangular straightened-edged materials, it is important to lay the tiles staggered but not in line with the centre of the tile, as this will offset any flatness flaws in any oversize tiles.

Since the material is cut or ground to a straight-edge, to prevent this problem occurring, it is advisable to lay the material staggered by 6 to 10 cm, depending on the length. It is highly advisable to have the tiles laid by a professional tiler who, after checking that the concrete bed is flat, will ensure the material is laid to perfection.

Finally, we suggest you use the R.L.S. (Raimondi Levelling System) when laying, concerning which you should note the following.

The R.L.S. system has revolutionised the world of tile laying, guaranteeing perfectly levelled floors as well as quick and easy laying, and no more uneven tiling. The R.L.S. system is perfect for oversize tiles, in particular for long, narrow sizes.

The R.L.S. is a three-part system, comprising; a base, a wedge, and a clamp. The bases are available in two different versions; for tiles with a thickness of between 3 and 12 mm; for tiles with a thickness of between 12 and 20 mm.

The wedge is the only part that is used for both bases and can be reused over again. The adjustable clamp is available in one version for laying on the floor and a different version for laying on a wall and is recommended to allow easy insertion of the wedges into the bases, while optimising the pressure exerted on the tile. The clamp is the same, regardless of the tile thickness.

### DIFFERENCES IN TILE COLOUR

The colour shading difference index is a means of rating the difference in colour tone from one tile to another. The reference value for each series is shown in the catalogue (V1 even shading - V4 different shading and patterns). The catalogue also clearly states that the colour of the tiles in the pictures is provided for illustrative purposes only and that these tones normally vary from one batch to another. This means that receipt

of a colour tone which differs from the sample cannot be considered grounds for complaint.

The classic example is that of a difference in colour with respect to the relative sample chosen in the shop.

### CLAIMS CONCERNING OBVIOUS DEFECTS

Defects are divided into obvious defects, i.e. flaws that are clearly and immediately visible, and hidden defects, i.e. flaws that appear over time. In the case of tiles, it should be noted that obvious defects are those which are visible prior to laying and hidden defects are those that become noticeable after laying and are not necessarily attributable to the tiles but could be caused by other factors.

As stated above and as highlighted on the packaging, before laying the material it is important to check that the material is compliant. According to standard UNI 10545-1, in order to be considered compliant, at least 95% of the tiles supplied must have no defects. Claims based on this right can only be made if the material has not been laid, as laying renders them worthless.

Obvious defects include the following:

- Flaws in the pattern
- Flaws in the surface (scratches, lumps, black pinpoints, surface finish)
- Variations in colour (according to UNI 11493, the tiler must ensure good lighting during laying so as to be able to check that the laying is proceeding correctly; poor lighting cannot, therefore, be used as a justification)
- Dimensional defects (length, flatness, curvature in the centre,...)
- According to UNI 11493/2016: MINIMUM OBSERVATION DISTANCE First and foremost, in paragraph 5.2.2, the said standard specifies that the visual inspection must be carried out from a minimum distance of 1,5 m (i.e. inspecting the flooring from a standing position or the wall tiles from a distance, so, neither lying on the floor nor standing up close to the wall).
- According to UNI 11493/2016: VISUAL INSPECTIONS IN OBLIQUE LIGHT ARE NOT ALLOWED Secondly, again in the same paragraph, the standard establishes that the floor or wall tiling being inspected cannot be lit using oblique light.

This is because oblique light highlights even the slightest unevenness in the tile or the laying.

After laying, rather than the manufacturer, the tiler or the contractor is liable for these defects.

### IT

### RICEVIMENTO MERCE

- Controllare la corrispondenza tra documento di trasporto, ordine e quanto ricevuto.
- Verificare l'integrità esterna dell'imballo (assenza di urti o deterioramenti visibili).
- Aprire l'imballo controllando almeno la prima lastra (tono, aspetto, scelta, calibro), oltre a verificare lo stato del materiale (la movimentazione delle lastre deve avvenire secondo indicazioni fornite).
- Si ricorda che il materiale posato non può più essere contestato per non conformità di aspetto o per diffeologia evidente.

### MOVIMENTAZIONE

Urti importanti e accidentali possono provocare la rottura del materiale. Più lastre possono essere stoccate e movimentate sovrapposte solo se di pari dimensioni. Evitare che la lastra (o parte di essa) venga posizionata su tagli o sfridi di dimensione inferiore e verificare sempre che l'appoggio sia privo di vuoti o spazi. Evitare di posizionare altri materiali sulle lastre. Prendere attenzione in ogni fase di movimentazione, al fine di evitare urti che possano provocarsi sboccature e/o rotture delle lastre. Anche la presa della singola lastra va eseguita con precauzione, posizionando la pinza centralmente e nei limiti di peso indicati dal macchinario. Per le prese multiple mediante sollevatore a bilancino, utilizzare scrupolosamente la cinghia in tela, opportunamente rivestita con gomma anti-taglio, posizionando le lastre con le dovute distanze e precauzioni. Si consiglia di inserire sul fondo e sulla parte superiore un distanziale in legno, con dimensioni superiori al pacchetto di lastre sulle quale appoggiare le cinghie affinché il peso e la tensione non gravino direttamente sulle lastre. Non utilizzare cavi di acciaio o catene che possano rovinare la superficie e i bordi.

I pezzi ottenuti dalla lavorazione possono risultare taglienti e devono pertanto essere maneggiati con cura e protezioni adeguate. La movimentazione dei singoli elementi (anche quelli privi di forature) deve avvenire sempre di costa. Il materiale tagliato deve essere imballato in casse dotate di protezione degli spigoli e pannelli ammortizzanti nelle parti perimetrali (con spessori adeguati) per preservarlo in caso di urto.

Il confezionamento non idoneo del prodotto può provocarne la rottura.

### ASPETTO SUPERFICIALE

Controllare ogni singola lastra. Le lastre sono ottenute per lavorazione di materie prime di origine naturale. L'osservazione va fatta alla distanza di 80 cm, perpendicolarmente alla superficie e con luce naturale.

Piccole imperfezioni sono considerate accettabili con i seguenti limiti:

- Inquinamento (punti di colore estranei alla grafica a forte contrasto di colore con il fondo): fino a 1 mm.
- Grumi a rilievo (basso contrasto di colore con il fondo): fino a 3 mm di diametro e 1 mm di spessore rispetto al fondo.
- Sono ammessi punti neri fino ad 1 mm di diametro.
- La concentrazione di punti a contrasto di colore con diametro inferiore al millimetro è limitata a 6 per decimetro quadrato.
- La contestazione per imperfezione dovuta ad una mancanza di stampa, per essere accettata deve presentare una riga continua. L'osservazione va fatta alla distanza di 80 cm, perpendicolare alla superficie e con luce naturale.

### POSA

Per valorizzare le caratteristiche del prodotto in fase di posa, un accorgimento basilare per la posa del nostro prodotto è quello di alternare con cura le differenti tonalità prelevando le piastrelle a gruppi di 3-4 pezzi per volta da almeno cinque scatole diverse. Distribuire in modo armonioso le diverse sfumature di colore che si evidenziano e controllare il risultato di tanto in tanto, osservando da opportuna distanza una porzione di lavoro eseguita.

Per la posa di materiali rettificati è sempre indispensabile mantenere una fuga minima di 2/3 mm da una piastrella all'altra usufruendo di stucchi e sigillanti di colore coordinato a quello del materiale. Nella posa dei materiali rettificati rettangolari, è importante evitare di far collimare i vertici di una piastrella con la meta delle altre al fine di sopprimere alle eventuali imperfezioni di planarità presenti comunque in tutti i grandi formati. Trattandosi di materiale tagliato o rettificato, per evitare tale problema, è consigliabile posare il materiale a correre, con intervallo da 6 a 10 cm a seconda della lunghezza. È fortemente auspicabile affidare la posa a personale esperto che, dopo aver verificato la corretta planarità della caldina, contribuirà alla impeccabile esecuzione dell'incarico. Suggeriamo infine di adattarsi al sistema di posa R.L.S. (Raimondi Levelling System) per il quale vi forniamo le seguenti indicazioni.

Il sistema R.L.S. rivoluziona il mondo della posa garantendo di ottenere con semplicità e rapidità pavimenti perfettamente livellati eliminando i dislivelli tra le piastrelle. R.L.S. è perfetto per grandi formati e in particolare per formati stretti e lunghi.

R.L.S. è composto di 3 elementi: base, cuneo, pinza. Le basi sono disponibili in due diverse versioni: per piastrelle di spessore compreso tra i 3 e i 12mm; le piastrelle di spessore compreso tra i 12 e 20 mm. Il cuneo è l'unico per entrambi le basi ed è riutilizzabile infinite volte. La pinza regolabile è disponibile in versione per posa a pavimento e in versione per posa a rivestimento ed è consigliata per inserire con facilità i cunei nelle basi, ottimizzando al contempo la pressione esercitata sulla piastrella. La pinza è unica indipendentemente dallo spessore della piastrella.

### DIFFORMITÀ DEL COLORE DELLE PIASTRELLE

L'indice di stonalizzazione è la classificazione della diversità di tono di colore da una piastrella all'altra. Il valore di riferimento per ogni serie è riportato su catalogo (V1 colore uniforme – V4 colore e grafiche diverse). Nel catalogo inoltre è specificato che il tono delle piastrelle è puramente indicativo e che normalmente varia da lotto a lotto. Questo significa che non può essere motivo di contestazione l'aver ricevuto un tono diverso dal campione.

Il classico esempio è quello della difformità di colore rispetto al campione di riferimento scelto nel negozio.

### CONTESTAZIONI PER VIZI PALESI

I vizi si distinguono in palesi, vale a dire immediatamente percepibili, ed occulti, vale a dire che si manifestano nel tempo. Nel caso delle piastrelle si può dire che i vizi palesi sono quelli che si possono evidenziare prima della posa e che i vizi occulti sono quelli che si evidenziano dopo la posa e che possono anche non essere imputati alle piastrelle ma ad altri componenti. Come specificato nei punti precedenti e come indicato sugli imballi, prima di posare il materiale bisogna controllare che il materiale sia conforme. La norma UNI 10545-1 dice che, la fornitura per ritenersi conforme deve presentare almeno il 95% di piastrella senza difetti. Si può rivalere di questo diritto solo se il materiale non è stato posato, caso decadenza valore.

Per vizi palesi si indicano:

- Difetti grafici
- Difetti superficiali (graffi, grumi, punti neri, superficie)
- Variazioni toni (La norma UNI 11493 riporta che il posatore deve mettersi nelle migliori condizioni di luce per controllare il buon andamento della posa e quindi non si possono accampare motivazioni di scarsa illuminazione)
- Difetti dimensionali, (lunghezza, planarità, curvatura al centro, ...)
- Secondo la Norma Uni 11493/2016: DISTANZA MINIMA DELL'OSSERVATORE

Innanzitutto la norma stabilisce al paragrafo 5.2.2 che l'esame visivo si effettua ad una distanza minima di 1,5 metri (quindi osservando il pavimento stando in piedi o il rivestimento stando a distanza: non ci si sdraia a terra, né si esamina il rivestimento standoci attaccati).

• Secondo la Norma Uni 11493/2016, NON AMMESSO ESAME CON LUCE RADENTE
In secondo luogo, sempre allo stesso paragrafo la norma stabilisce che non si può illuminare il pavimento o il rivestimento oggetto di analisi con luce radente. La luce radente, infatti, evidenzia anche minime irregolarità della piastrella o della posa.

In seguito la posa tutti questi difetti non saranno più responsabilità del produttore ma del posatore o appaltatore.

### FR

### RÉCEPTION DES MARCHANDISES

- Contrôler la correspondance entre le document de transport, la commande et le matériel reçu.
- Vérifier l'intégrité externe de l'emballage (absence de traces de choc ou de détériorations visibles).
- Ouvrir l'emballage, en vérifiant au moins la première dalle (ton, aspect, choix, calibre), ainsi que l'état du matériau (les dalles doivent être manipulées selon les instructions fournies).
- On rappelle que le matériel posé ne peut plus être contesté pour aspect non conforme ou défaut évident.

### MANUTENTION

Des impacts majeurs et accidentels peuvent provoquer la cassure du matériau. Plusieurs dalles peuvent être stockées et manipulées en se chevauchant uniquement si elles sont de taille égale. Éviter que la dalle (ou une partie de celle-ci) soit positionnée sur des coupures ou des rebuts d'une dimension inférieure et toujours vérifier que le support est exempt de vides ou d'espaces. Éviter de positionner d'autres matériels

sur les dalles. Faire attention à chaque phase de la manutention, afin d'éviter les chocs susceptibles de provoquer un cisaillement et/ou une rupture des dalles. De même, la préhension d'une dalle à la fois doit être effectuée avec précaution, en positionnant la pince au centre et dans les limites de poids indiquées par la machine. Pour les préhensions multiples au moyen d'un élévateur à palonnier, utiliser scrupuleusement la sangle en toile, convenablement revêtue de caoutchouc anti-coupure, en positionnant les dalles à la bonne distance et avec les précautions appropriées. Il est conseillé d'insérer une entretoise en bois sur le fond et sur le dessus, de dimensions supérieures à l'ensemble du paquet des dalles sur lesquelles reposer les angles afin que les poids et la tension ne pésent pas directement sur les dalles. Ne pas utiliser de câbles en acier ou de chaînes qui pourraient endommager la surface et les bords. Les pièces usinées peuvent être tranchantes et doivent donc être manipulées avec soin et des protections adéquates. La manutention d'éléments individuels (même ceux sans trous) doit toujours être effectuée sur le côté. Le matériel coupé doit être emballé dans des boîtes équipées d'une protection des arêtes et de panneaux antichocs au niveau des parties périmétriques (avec des épaisseurs adéquates) pour le préserver en cas de choc. Un emballage inadéquat du produit peut entraîner une cassure.

### ASPECT DE LA SURFACE

Vérifier chaque dalle. Les dalles sont obtenues par la transformation de matières premières d'origine naturelle. L'observation doit être effectuée à une distance de 80 cm, perpendiculairement à la surface et en présence d'une lumière naturelle.

Les petites imperfections sont réputées acceptables dans les limites suivantes:

- Pollution (points de couleur étrangers présentant un fort contraste de couleur avec le fond) : jusqu'à 1 mm.
- Grumeau en relief (faible contraste de couleur avec le fond) : jusqu'à 3 mm de diamètre et 1 mm d'épaisseur par rapport au fond.
- Les points noirs d'un diamètre maximal de 1 mm sont admis.
- La concentration de points de contraste de couleur d'un diamètre inférieur à un millimètre est limitée à 6 par décimètre carré.
- Pour être acceptée, une contestation pour imperfection due à un défaut d'impression, doit comporter une ligne continue. L'observation doit être effectuée à une distance de 80 cm, perpendiculaire à la surface et en présence d'une lumière naturelle.

### POSE

Afin de valoriser les caractéristiques du produit lors de la pose, une précaution élémentaire consiste à alterner soigneusement les différentes teintes en prélevant les carreaux par groupes de 3-4 pièces à la fois dans au moins cinq boîtes différentes. Répartir les différentes nuances de couleur qui ressortent harmonieusement et vérifier de temps en temps le résultat en observant une partie du travail réalisé à une distance convenable.

Lors de la pose de matériel rectifié, il est toujours indispensable de maintenir un joint minimum de 2/3 mm d'un carreau à l'autre, en utilisant des joints et des mastics assortis à la couleur du matériel. Lors de la pose de matériel rectifié rectangulaire, il est important d'éviter que les sommets d'un carreau coïncident avec la moitié des autres carreaux afin de compenser d'éventuelles imperfections de planéité qui sont toujours présentes dans tous les grands formats. Étant donné qu'il s'agit de matériel coupé ou rectifié, pour éviter ce problème, il est conseillé de poser le matériel à coupe perdue, avec un intervalle de 6 à 10 cm selon la longueur. Il est hautement souhaitable de confier la pose à un personnel expert qui, après avoir vérifié la bonne planéité de la sous-couche isolante, contribuera à l'exécution sans faille de la tâche.

Enfin, nous suggérons de s'adapter au système de pose R.L.S. (Raimondi Levelling System) pour lequel nous fournissons les informations suivantes. Le système R.L.S. révolutionne le monde de la pose en garantissant l'obtention du carrelage parfaitement nivelé de manière simple et rapide, en éliminant les différences de niveau entre les carreaux. R.L.S. est parfait pour les grands formats et en particulier pour les formats étroits et longs.

R.L.S. se compose de 3 éléments : base, coin, pince. Les bases sont disponibles en deux versions différentes : pour les carreaux d'une épaisseur comprise entre 3 et 12 mm; pour les carreaux d'une épaisseur comprise entre 12 et 20 mm.

La cale est la seule pour les deux bases et elle est réutilisable à l'infini. La pince réglable, disponible dans les versions pour pose au sol et murale, est recommandée pour faciliter l'insertion des coins dans les bases tout en optimisant la pression exercée sur le carreau. La pince est unique indépendamment de l'épaisseur du carreau.

### DIFFÉRENCES DE COULEUR DES CARREAUX

L'indice de détonalisation est une classification de la différence de tonalité des couleurs d'un carreau à l'autre. La valeur de référence pour chaque série est indiquée dans le catalogue (V1 couleur uniforme - V4 différents graphismes et couleurs). Le catalogue indique également que la tonalité des carreaux est purement indicative et varie normalement d'un lot à l'autre. Cela signifie que la réception d'une tonalité différente de celle de l'échantillon ne peut constituer un motif de plainte. L'exemple classique est celui de l'écart de couleur par rapport à l'échantillon de référence choisi dans le magasin.

### CONTESTATIONS POUR DÉFAUTS MANIFESTES

On distingue les défauts manifestes, c'est-à-dire ceux qui sont immédiatement perceptibles, et les défauts cachés, c'est-à-dire ceux qui deviennent apparents avec le temps. Dans le cas des carreaux, on peut dire que les défauts manifestes sont ceux qui peuvent être détectés avant la pose et que les défauts cachés sont ceux qui interviennent après la pose et qui peuvent ne pas être attribuables aux carreaux, mais à d'autres composants.

Comme spécifié dans les points précédents et comme indiqué sur l'emballage, la conformité du matériel doit être vérifiée avant la pose. La norme UNI 10545-1 stipule que, pour être réputée conforme, la fourniture doit présenter au moins 95 % de carreaux sans défaut. Ce droit ne peut être exercé que si le matériel n'a pas été posé. Au contraire, le droit s'éteint.

Les défauts manifestent sont indiqués ci-après :

- Défauts graphiques
- Défauts de surface (rayures, grumeaux, points noirs, surface)
- Les variations de ton (La norme UNI 11493 stipule que l'installateur doit prévoir les meilleures conditions d'éclairage pour vérifier la bonne exécution de la pose, et donc aucune raison ne peut être invoquée pour un mauvais éclairage)
- Défauts dimensionnels, (longueur, planéité, courbure au centre, etc.)
- Selon la Norme Uni 11493/2016 : DISTANCE MINIMALE DE L'OBSERVATEUR Tout d'abord, la norme stipule au paragraphe 5.2.2 que l'examen visuel doit être effectué à une distance minimale de 1,5 mètre (c'est-à-dire en observant le sol en étant debout ou le revêtement mural en étant debout à distance: on ne se couche pas sur le sol ou et on n'examine pas le revêtement en étant contre celui-ci).
- Selon la norme Uni 11493/2016; EXAMEN AVEC LUMIÈRE RADIANTE NON AUTORISÉE Ensuite, toujours dans le même paragraphe, la norme indique que le revêtement de sol ou mural analysé ne peut pas être éclairé par une lumière rasante.

En effet, la lumière rasante met en évidence les moindres irrégularités du carreau ou de la pose.

Après l'installation, tous ces défauts ne seront plus de la responsabilité du fabricant, mais du poseur ou de l'entrepreneur.

### D

### WARENEINGANG

Gleichen Sie den Lieferschein und Transportpapiere beim Wareneingang mit der Bestellung ab.

Überprüfen Sie die Verpackung auf sichtbare Beschädigung.

Öffnen Sie die Verpackung und überprüfen Sie mindestens die erste Platte auf deren Zustand auf Ton, Aussehen, Wahl und Kaliber. (Die Handhabung der Platten muss nach den angegebenen Hinweisen erfolgen).

Beachten Sie, dass verlegtes Material nicht mehr aufgrund optischer Abweichung oder offensichtlicher Mangel reklamiert werden kann.

### HANDHABUNG

Größere, auch unbeabsichtigte Stöße können zum Bruch des Materials führen. Mehrere Platten können nur übereinander gelagert werden, wenn sie die gleiche Größe haben. Vermeiden Sie, dass die Platte (oder ein Teil davon) auf Schnitte oder Abschnitte kleinerer Größe gelegt wird und überprüfen Sie immer, dass die Unterlage frei von Hohlräumen oder Zwischenräumen ist. Vermeiden Sie es, andere Materialien auf die Platten zu legen.

Vermeiden Sie Kollisionen in jeder Handhabungsphase, die zum Abplatzen und / oder Brechen der Platten führen können. Auch das Greifen der einzelnen Platten muss sorgfältig erfolgen, wobei der Greifer mittig und innerhalb der von der Maschine angegebenen Gewichtsgrenzen positioniert wird.

Verwenden Sie bei Sauggreifer geeignete Gewebespanngurte und positionieren Sie die Platten mit den erforderlichen Abständen und Vorsichtsmaßnahmen.

Es wird empfohlen, unten und oben einen hölzernen Abstandshalter einzulegen, der größer als das Plattenpaket ist, auf dem die Riemen platziert werden sollen, damit das Gewicht und die Spannung nicht direkt auf die Platten einwirken. Keine Stahlselle oder Ketten verwenden, die die Oberfläche und Kanten beschädigen können. Die bei der Verarbeitung anfallenden Stücke können scharfkantig sein und müssen daher mit Vorsicht und ausreichendem Schutz behandelt werden. Die Handhabung der Einzelelemente (auch ohne Löcher) muss immer senkrecht erfolgen. Das geschnittene Material muss in Kisten verpackt werden, die mit Kantenschutz und stoßdämpfenden Platten in den Randbereichen (mit ausreichender Dicke) ausgestattet sind, um es im Falle einer Kollision zu bewahren.

Eine unsachgemäße Verpackung des Produkts kann zu Bruch führen.

### OVERFLÄCHENPRÜFUNG

Überprüfen Sie jede einzelne Platte!

Die Platten werden durch die Verwendung natürlicher Rohstoffe produziert und so muss vor Verlegung eine Sichtprüfung in einem Abstand von 80 cm, senkrecht zur Oberfläche und mit natürlichem Licht vorgenommen werden.

Kleine Unvollkommenheiten werden mit den folgenden Einschränkungen als akzeptabel betrachtet:

- Verschmutzung (Farbpunkte ohne Bezug zur Grafik mit starkem Farbkontrast zum Hintergrund): bis zu 1 mm².
- Reliefpickel (geringer Farbkontrast zum Hintergrund): bis zu 3 mm Durchmesser und 1 mm Dicke im Vergleich zum Boden.
- Schwarze Punkte bis 1 mm Durchmesser sind erlaubt.
- Die Konzentration kontrastierender Farbpunkte mit einem Durchmesser von weniger als einem Millimeter ist auf 6 Stck. pro Quadratdezimeter begrenzt.
- Ein Einwand wegen Unvollkommenheit aufgrund fehlenden Drucks, oder einer durchgezogenen Linie muss anhand Fotos gemeldet werden. Die Sichtung muss in einem Abstand von 80 cm senkrecht zur Oberfläche und bei natürlichem Licht erfolgen.

### VERLEGUNG

Um die Eigenschaften des Produkts während der Installationsphase zu verbessern, sind grundlegende Vorsichtsmaßnahme für die Installation zu beachten:

Die Platten bestehen aus verschiedenen Farbtöne, die möglichst aus fünf verschiedenen Kartons abzuwechseln bzw. zu kombinieren sind. Verteilen Sie die einzelnen Platten zu einer harmonischen Gesamtbild und vermeiden Sie abweichende Farbton innerhalb einer Fläche.

Bei der Installation von rektifizierten Materialien ist es unerlässlich einige Mindestfuge von 2/3 mm zwischen den Platten einzuhalten und geeignete, farblich abgestimmte Fugenmörtel und Dichtstoffe zu verwenden. Beim Verlegen von rechteckigen rektifizierten Materialien ist es wichtig den Scheitelpunkt einer Platte nicht in die Hälfte der zwei anschließenden Platten zu stoßen um eventl. entstehende Ebenheitsunterschiede zu kompensieren.

Da das Material geschnitten oder geschliffen wird, ist es ratsam das Material in einem Versatz von maximal 6-10cm zu verlegen. Generell sollte Fachpersonal mit der Verlegung von Großformaten beauftrag werden.

Schließlich empfehlen wir , z.B. das R.L.S. (Raimondi Leveling System) zu verwenden.

Die R.L.S. revolutioniert die Welt des Verlegens, garantiert einfach und schnell, perfekt nivellierte Böden und beseitigt Unebenheiten zwischen den Fliesen.

R.L.S. es perfekt für große Formate, im besonderen für schmale und lange Formate.

R.L.S. besteht aus 3 Elementen: Basis, Keil, Klemme. Das Basiselement ist in zwei verschiedenen Ausführungen erhältlich: für Fliesen mit einer Dicke zwischen 3 und 12 mm; sowie Fliesen mit einer Dicke zwischen 12 und 20 mm.

Der Keil ist der einzige für beide Basiselemente und kann immer wieder verwendet werden.

Ein verstellbarer Greifer ist für die Verlegung auf dem Boden und in einer Version für die Verlegung an der Wand verfügbar und wird empfohlen.

### FARBUNTERSCHIEDE

Der Farbtonindex ist die Klassifizierung der Farbtonvielfalt von einer Fliese zur anderen.

Der Referenzwert für jede Serie ist im Katalog angegeben (V1 einheitliche Farbe - V4 Farbe und Grafik sehr unterschiedlich). Der Katalog gibt auch an, dass der Ton der Fliesen rein inkativ ist und normalerweise von Produktion zu Produktion variieren kann. Dies bedeutet, dass ein vom Sample abweichender Ton kein Grund zur Beanstandung sein kann. Das klassische Beispiel ist der Farbutonschied zum im Shop gewählten, bzw. beispielhaften Referenzmuster.

### ANSPRUCH AUF FEHLERFREIHEIT

Mängel werden unterschieden in offensichtlich, d. h. sofort wahrnehmbar, und versteckt, d. h. erst im Laufe der Zeit erkennbar. Bei Fliesen ist davon auszugehen, dass sich eventuelle Mängel offensichtlich darstellen und bereits vor der Installation erkennbar sind. Versteckte Mängel sind diejenigen, die nach der Installation hervortreten, wobei diese in der Regel nicht der Fliese, sondern anderen Komponenten zuzuordnen sind. Wie in den vorherigen Punkten und wie auf der Verpackung angegeben, ist vor dem Verlegen des Materials zu überprüfen, ob das Material der Norm Uni 10545-1entspricht, die besagt, dass mindestens 95 % der Fliese fehlerfrei sein müssen.

Ein Rückgaberecht entsteht nur, wenn das Material nicht eingebaut wurde, weil sonst nicht mehr brauchbar.

Bei offensichtlichen Mängeln werden folgende Angaben gemacht:

- Grafikfehler
- Oberflächenfehler (Kratzer, Pickel, Einschüsse)
- Stonvariationen (Die Norm Uni 11493 besagt, dass sich der Installateur in die besten Bedingungen, wie geeignete Lichtverhältnisse zur unabhängigen Prüfung der Installation, versetzen muss. (Daher können keine Beanstandungen aufgrund schlechtem Licht gestellt werden)
- Maßfehler (Länge, Ebenheit, Krümmung in der Mitte, ...)
- Gemäß der Norm Uni 11493/2016: MINDESTABSTAND DES BEOBACHTERS Zunächst legt die Norm in Absatz 5.2.2 fest, dass die Sichtprüfung in einem geeigneten Mindestabstand durchgeführt wird. Im Bodenbereich sind 1,5 Meter Abstand einzuhalten um den Belag zu sichten. In geringerem Abstand zu erkennende Mängel sind nicht Beanstandungsfähig.
- Gemäß der Norm Uni 11493/2016; NICHT ZUGELASSENE UNTERSUCHUNG MIT STREIFLICHT Die Norm legt fest, dass der Boden oder die Beschichtung nicht unter Streiflicht analysiert werden darf, da Streiflicht sogar minimale, unvermeidliche Unregelmäßigkeiten hervorhebt.

Für alle diese Mängel ist nach der Installation nicht mehr der Hersteller verantwortlich, sondern der Installateur oder Auftragnehmer.

## Logistic service

Servizi di logistica. Service de logistique. Logistikdienstleistungen.

### SPLIT PALLET ORDERS:

Orders related to 9mm thickness goods with quantity below the pallet will be charged with an additional 2,00€/sqm. Orders containing 120x120, 120x270, 160x320 sizes either in 6 or 12 mm, as well as all TH2.0 range, will be charged with an additional 10%.

### SMALL QUANTITY ORDERS:

Orders with a rateable value under 100€ will be charged with a handling and packing fee equal to 30€.

### CANCELLATION OF ALREADY DISPATCHED ORDERS / RETURNS:

In case of cancellations (within a maximum of 30 days) of orders which have been already delivered to our Maranello warehouse or in case of authorized return (provided goods received by the customer are returned in good condition), the factory will charge an additional 15% of the order taxable amount, with a minimal value of 50€, as a contribution for the transport and take back expenses.

### SPALLETTIZZATO:

Per ordini inferiori al pallet completo verrà applicata una maggiorazione di 2,00€/M<sup>2</sup> a tutti i formati con spessore 9 mm fino al 60x120 incluso. Per i formati 120x120, 120x270, 160x320 con spessore 6/12 mm e per la gamma TH2.0 la maggiorazione è del 10%.

### ORDINI DI PICCOLE QUANTITÀ:

Per ordini di valore imponibile inferiore ai 100€ verrà applicato un costo di movimentazione e imballaggio di 30€.

### ANNULLAMENTO ORDINI GIÀ SPEDITI / RESO:

In caso di annullamento autorizzato (entro max 30 giorni) di ordini per materiale già consegnato al nostro deposito di Maranello o di reso autorizzato di materiale già ricevuto dal cliente (in buono stato), verrà addebitato il 15% del valore imponibile con importo minimo di 50€, per contributo spese di trasporto e ripresa in carico.

### CONTREMARQUE:

Pour les commandes inférieures à une palette complète, un supplément de 2,00 €/m<sup>2</sup> sera appliqué sur les prix nets « palettes et plus » pour tous les formats d'épaisseur 9 mm jusqu'au 60x120 inclus. Pour les formats 120x120, 120x270, 160x320 6mm/12mm et pour la gamme TH2.0 la majoration est de 10%.

### COMMANDES DE PETITES QUANTITÉS:

Pour toutes les commandes d'une valeur imposable inférieure à 100€, nous appliquerons des frais de manutention et d'emballage de 30€.

### POLITIQUE D'ANNULATION DE COMMANDES DÉJÀ EXPÉDIÉES/ POLITIQUE DE RETOUR:

Toute annulations ou retours doivent être autorisés par l'entreprise. Le client a 30 jours à disposition pour soumettre la demande. En cas d'annulation autorisée d'une commande de matériel déjà livré à notre entrepôt de Maranello ou d'un retour autorisé de matériel déjà reçu par le client (à condition qu'il soit en bon état), nous débiteons au client un 15% de la valeur imposable. Dans le cas où le 15% soit inférieur à 50€, nous débiteons toutefois un forfait de 50€ à titre de participation aux frais de transport et de reprise.

### KOMMISSIONIERUNG:

Bei Bestellungen unter einer vollen Palette wird ein Zuschlag von €2,00/m<sup>2</sup> auf alle 9 mm starken Formate bis einschließlich 60x120 erhoben. Für die Formate 120x120, 120x270, 160x320 6/12 mm und für die TH2.0-Reihe beträgt die Erhöhung 10 %.

### KLEINE MENGENBESTELLUNGEN:

Bei Bestellungen mit einer steuerpflichtigen Wert von weniger als 100 € werden Bearbeitungs- und Verpackungskosten von 30€ berechnet.

### STORNIERUNG BEREITS VERSANDTER/ZURÜCKGEBEBENER BESTELLUNGEN:

Im Falle einer autorisierten Stornierung (innerhalb von maximal 30 Tagen) von Bestellungen für bereits an unser Lager in Maranello geliefertes Material oder einer autorisierten Rückgabe von bereits vom Kunden erhaltenem Material (in gutem Zustand) werden 15% des steuerpflichtigen Wertes berechnet, wobei der Mindestsatz von 50 € für Transport- und Rücknahmekostenbeitrag beträgt.
